UNITED ARAB EMIRATES BRANCHES  
FINANCIAL STATEMENTS AND  
INDEPENDENT AUDITOR'S REPORT  
FOR THE YEAR ENDED DECEMBER 31, 2020**

**CONTENTS****PAGE**

Independent auditor's report

1 to 8

**Components of financial statements**

- Statement of financial position

9

- Statement of profit or loss and other comprehensive income

10

- Statement of changes in equity

11

- Statement of cash flows

12 and 13

- Notes to the financial statements

14 to 59

## Independent auditor's report to the Directors of Bank Saderat Iran

### Bank Saderat Iran United Arab Emirates Branches

#### Report on the audit of the financial statements

#### Opinion

We have audited the financial statements of **Bank Saderat Iran (United Arab Emirates Branches) (the "Bank")**, which comprise the statement of financial position as at December 31, 2020, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes to the financial statements as set out on pages - 9 to 59.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Bank as at December 31, 2020, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs).

#### Basis for opinion

We conducted our audit in accordance with the International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Bank in accordance with the ethical requirements that are relevant to our audit of the financial statements in the United Arab Emirates, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Emphasis of matter

Without qualifying our audit opinion, we draw attention to the following:

1. As discussed in note 30 to the financial statements:

- The Bank has been subjected to implementing notices by Central Bank of the U.A.E ("CBUAE") on account of the restrictions imposed by the Security Council of the United Nations on certain Iranian entities and individuals. Management believes that the Bank has complied with all such notices issued by the Central Bank of the UAE. Management of the Bank also believes that despite such restrictions being imposed, the going concern assumption used in the preparation of financial statements for the year ended December 31, 2020 is still appropriate;
- The Office of Foreign Assets Control ("OFAC") of the United States' Department of the Treasury has also resolved to impose restrictions on certain Iranian entities and individuals, including Bank Saderat Iran. Management of the Bank believes that these restrictions did not have a significant impact on the Bank's ability to continue as a going concern; and

*(Independent auditor's report on Bank Saderat Iran - United Arab Emirates Branches continued on next page...)*

***(Independent auditor's report on Bank Saderat Iran - United Arab Emirates Branches continued...)***

- In the last few years, a number of countries including US, UK and other European countries have imposed / reinforced sanctions on Iranian banks. More significantly, European Union Council Decision 2012/152/CFSP of March 15, 2012 provided for a ban on the supply of specialised financial messaging services used to exchange financial data, to certain Iranian banks. As a result of this, the Society for Worldwide Interbank Financial Telecommunication ("SWIFT") disconnected certain Iranian banks, including Bank Saderat Iran from its international network with effect from March 17, 2012.

Management of the Bank believes that since the Bank has not had business dealing / relations with any of the banks in the countries referred to above for a long period of time and it mainly deals with Iranian Banks which have their own intra-communication arrangements, the business activities of the Bank have not been significantly affected by the inability to use SWIFT. Further, in response to this, the Bank has introduced measures in order to ensure uninterrupted, legalised, authenticated transmission of messages and continuation of business activities including transfer of funds.

This financial statement does not take account of the potential future impacts of the current and any further restrictions that may be imposed by The Security Council of the United Nations and The Office of Foreign Assets Control of the United States' Department of the Treasury and restrictions that may be imposed by other countries.

2. As discussed in note 31 to the financial statements:

- In response to the COVID-19 crisis, the Bank continues to monitor and respond to all liquidity and funding requirements through its plans of liquidity contingency and stress tests reflecting the current economic scenarios. The Bank shall continue to re-assess the strength of its liquidity, funding and capital position to absorb the possible impact of the current disruption in the coming period. As at the statement of financial position date, the management of the Bank is confident to continue with the operations of the Bank and accordingly these financial statements have been prepared on a going concern basis.

- The CBUAE has adopted a proactive approach in order to ensure flow of credit to the economy, especially sectors severely impacted by the COVID-19 crisis. The CBUAE announced a comprehensive Targeted Economic Support Scheme ("TESS") on March 15, 2020, allowing UAE Banks to access zero cost funding and pass on the benefit through Principal or/and Interest deferrals to their customers. As at the statement of financial position date, the Bank has not utilised zero funding facility under TESS program.

3. We draw attention to note 18 where an employee of the Bank has done embezzlement of funds from customers' dormant accounts during prior years. The Bank had filed a legal suit against the employee. The total amount embezzled by the employee but not recovered by the Bank amounting to AED 1.6 million has been written-off during the current year.

**Other matter**

The financial statements of the Bank as at December 31, 2019 were audited by another auditor whose report dated May 31, 2020 expressed an unqualified opinion on those financial statements.

**Key Audit Matters**

Key Audit Matters (KAMs) are those matters that, in our professional judgement, were of most significance in our audit of the financial statements for the year ended December 31, 2020. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon.

***(Independent auditor's report on Bank Saderat Iran - United Arab Emirates Branches continued on next page...)***

Key audit matter	How our audit addressed the key audit matter
<b>1. Estimation uncertainty with respect to Expected Credit Losses (ECL) for loans and advances to customers</b>	<b>Credit Losses (ECL) for loans and advances to customers</b>
<p>The assessment of the Bank's determination of impairment allowances for loans and advances to customers requires the Bank's management to make judgements over the staging of financial assets and measurement of the Expected Credit Loss (ECL). The audit was focused on this matter due to the materiality of the loans and advances to customers (representing 39% of total assets) and the complexity of judgements, assumptions and estimates used in measurement of ECL models. The measurement of ECL are carried out by the models with limited manual intervention and are valid throughout the reporting period.</p>	<p>We gained an understanding of the Bank's business processes relating to credit risk management and estimation process of determining impairment allowances for loans and advances to customers. We have also tested the operating effectiveness of relevant controls within these processes.</p>
<p>The material portion of the Bank's portfolio of loans and advances is assessed individually for significant increase in credit risk (SICR) and measurement of ECL. This requires the Bank's management to capture all qualitative and quantitative reasonable forward looking information to assess the SICR or while assessing the credit impaired criteria. The Bank exercises significant judgements and makes a number of assumptions in developing ECL models, which include Probability of Default (PD), Loss given Default (LGD), Exposure at Default (EAD), forward looking information, macroeconomic adjustments and staging criteria.</p>	<p>We examined the soundness of the Expected Credit Loss Models developed by an external UAE firm appointed by the Bank, by performing recalculations on sample basis for each model to verify their arithmetical accuracy. Also, we enquired with the Bank about the assumptions made during the computation of Probability of Default (PD), Loss Given Default (LGD) and Exposure at Default (EAD) to verify for their consistency and reasonableness. We challenged the assumptions underlying the impairment allowance calculation, such as estimated future cash flows, collateral valuations and estimates of recovery. We evaluated controls over approval, accuracy and completeness of impairment allowances including assessing key management and committee meetings for loan impairment allowances.</p>
<p>Refer to note 4 to the financial statements for the accounting policy and note 27 for the credit risk disclosure.</p>	<p>We re-performed specific model calculations to confirm the risk parameter outputs and ECL amounts and the same were found to be reasonably appropriate and sufficient. Finally, we updated our assessment of the framework and methodology designed and implemented by the Bank as to whether the impairment model's outcome and stage allocation appear reasonable and reflective of the forecasts used by the Bank to determine future economic conditions at the reporting date of the financial statements.</p>

## **2. Impairment of loans and advances to specific customers**

Accounting for the allowance for impairment of loans and advances is an area that requires management of the Bank to make a complex and significant judgement over both timings of recognition and quantum of such impairment. The audit was focused on this matter due to the materiality of the loans and advance balances (representing 39% of total assets) and the subjective nature of the calculations. As at December 31, 2020, gross loans and advances amounted to AED 12,447 million against which provisions for impaired loans and advances amounting to AED 4,305 million were recorded. Further, the audit was focused on the gross exposure of a specific group of customers which represented 16.91% of gross loans and advances as at December 31, 2020.

We assessed the level of allowance for impairment loss against a specific group of customer based on the discussion with the senior management of the Bank and the detailed loan and counter-party information, which is maintained by the management in the credit file. We have also assessed the accuracy of the key data from the portfolios, the provision calculations and critically assessed management estimates and assumptions used in determination of impairment loss allowance.

Based on the objective evidence observed during the year, for a specific group of customers having a gross outstanding of AED 2,105 million as at December 31, 2020, the Bank has complied with the required level of allowance for the impairment loss.

## **3. Fair valuation of mortgaged properties situated in Iran as collaterals**

The Bank grants loans and advances to the customers after the necessary collaterals are obtained and evaluated by the Bank. Mortgaged properties situated in Iran are one of the major collaterals provided by the customers. The audit was focused on this matter due to the materiality of the fair value of these collaterals (representing 57% of gross amount of loans and advances from customers and constitutes 91% of total collaterals from such customers) and their significance in the calculation of allowance for impairment on loans and advances.

Our audit procedure included evaluating the methodologies, inputs and assumptions used by the Bank in assessing the adequacy of impairment allowance for individually assessed loans. We tested the design and operating effectiveness of relevant controls to determine allowance against the impaired loans. We tested some samples of impaired loans to test quantification, valuation of underlying collateral and estimates of recovery on default. The fair valuation of the properties held in Iran against impaired loans constitutes 91% of the total value of collaterals held by the Bank against such loans. Fair valuation of mortgaged properties held in Iran, valued in UAE Dirhams was estimated by Iran based external real estate agencies, duly approved by head office of the Bank.

We have relied on the certified report of external valuer Ref. no. 99/803576 dated October 20, 2020 for the purpose of assessing the fair valuation of the Iranian properties and thereby, the adequacy of the impairment allowance. In addition, we have also obtained the letter issued by Credit Facility Department of the Bank, Ref no. 182/4/505/2020 dated December 28, 2020 which states that mortgaged properties situated in Islamic Republic Of Iran for Bank Saderat Iran – U.A.E branches customers that have been approximately fair values, are in tangible existence and reasonable condition as at December 31, 2020.

#### **4. Recognition and recoverability of deferred tax assets**

The Bank is subject to income tax laws of respective Emirates of the United Arab Emirates in the jurisdiction in which it operates. Deferred taxes are recorded for the future consequences of events that have been recognized in financial statements or tax returns, based upon the enacted tax laws and rates. A deferred tax asset is recognised for deductible temporary differences, unused tax losses and unused tax credits to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilised.

The Bank has assessed deferred tax asset based on the deductible temporary differences as available with the Bank. A deferred tax asset is recognised for an unused tax credit only when it is considered probable that there will be sufficient future taxable profit against which the credit carryforward can be utilised. This raises concern over recognition and measurement of deferred tax asset as the management is required to form assumptions and prepare forecasts of future taxable profits to assess the recoverability of a deferred tax balance. These assumptions and forecasts are subject to future market and economic conditions which involve a high degree of uncertainty. As disclosed in note 11 to the financial statements, as at December 31, 2020 the Bank has recognized AED 1,358 million (December 31, 2019: AED 1,224 million) of deferred tax assets in the statement of financial position.

Our audit was focused on this matter due to the materiality of the deferred tax asset (representing 20% of total assets) and its recoverability due to its recognition involving judgement by the Bank, which is based on a number of factors including whether there will be sufficient taxable profits in future periods to support recognition.

#### **5. Large exposure to head office and its branches abroad and other banks outside U.A.E**

The Bank has exceeded the exposure limits as prescribed in circular no. 32/2013 dated November 11, 2013 concerning regulations re Monitoring of Large Exposure Limits, its amendments and the table of maximum large exposure limits issued by CBUAE. According to Article (2) of circular no. 32/2013 dated November 11, 2013 exposure to banks operating outside the UAE, irrespective of their maturity are not allowed to exceed 30% of the bank's capital base.

We reviewed the process of the determination of the deferred tax assets. We have relied on calculations of external tax specialists for recognition of deferred tax assets. We assessed the evidence provided by the Bank to utilize the deferred tax assets against the future taxable income of the Bank and key assumptions used by the management on the future economic development.

We focused on the Bank's examination of the carrying value of deferred tax assets reviewed at the end of the reporting period. The carrying amount of deferred tax assets is recognised to the extent that it is probable that sufficient taxable profit will be available to allow the benefit of part or all of that deferred tax asset to be utilised.

We relied on the correspondences documented between the Bank and the Tax Authority of respective Emirates' regarding the approval of the valuation of Deferred Tax Assets as at December 31, 2020.

We have relied upon the letter (Ref no.: 99/1371236) received from the Bank's head office (Tehran, Iran), dated March 17, 2021, wherein it states that the head office of the Bank assessed sufficiency of future taxable profits of the Bank to utilise deductible temporary differences and concluded minimal uncertainty to the Bank's future taxable profits. Accordingly, the head office of the Bank has given reasonable assurance for the recovery of the deferred tax assets in foreseeable future in accordance with IAS 12 *Income Taxes*.

We reviewed the credit policy for the purpose of assessing the risks and exposures arising therefrom. Since the Bank is carrying a significantly high exposure against the balances receivable from the head office & its branches abroad and other banks, we assessed the measures undertaken by the Bank to reduce its large exposure limits such as reducing placements to head office of the Bank and offering term loans to other foreign banks.

*(Independent auditor's report on Bank Saderat Iran - United Arab Emirates Branches continued...)*

The same applies to exposures of branches of foreign banks to their head offices and other branches abroad. The audit was focused on this matter as the Bank's exposure to head office and its branches abroad and to other Iranian banks outside U.A.E, exceeded the prescribed limit of 30% of the bank's Capital base as at December 31, 2020.

We were provided reasonable assurance for lowering the exposure relating to the balances of head office and its branches abroad in order to meet the requirement as prescribed in the circular issued by CBUAE. For the year ended December 31, 2020, the Bank's exposure to Head office and its branches abroad stood at 124% of its Capital base. We performed an overview of the action plan provided by the Bank to reduce its large exposure limits which include increasing placements with new foreign banks so as to reduce the large exposures to current banks outside U.A.E in the following financial year. During the year, Bank's exposure to six foreign banks exceeded 30% of its capital base. However, upon execution of the aforementioned plan, the exposure exceeded the prescribed limit for only two foreign banks as at December 31, 2020. We relied on letter CBUAE/BSA/2020/4769 from CBUAE dated October 27, 2020 where the large exposure breaches arising from decrease in regulatory capital after October 1, 2018 will not be subject to the 1:1 deduction.

**6. Large exposure to a single borrower or a group of related borrowers**

The Bank has exceeded the exposure limits as prescribed in circular no. 32/2013 dated November 11, 2013 concerning regulations re Monitoring of Large Exposure Limits, its amendments and the table of maximum large exposure limits issued by CBUAE. According to Article (2) of circular no. 32/2013 dated November 11, 2013, exposure to a single borrower or a group of related borrowers is not allowed to exceed 25% of the bank's capital base. The audit was focused on this matter as the Bank's exposure to a specific group of borrowers exceeded the prescribed limit by 46% of the bank's Capital base as at December 31, 2020.

We reviewed the credit policy for the purpose of assessing the risks and exposures arising therefrom. Since the Bank is carrying a significantly high exposure against the balances receivable from a specific group of borrowers, we assessed the measures undertaken by the Bank to reduce its large exposure limit such as recovery of outstanding funds from such customers on an instalment basis over the course of the following financial year.

Further, according to Notice No. 226/2018 dated October 1, 2018, concerning Large Exposures – Credit Concentrations Above Limits issued by the CBUAE, a 5 year grace period was granted to the banks to comply with the regulations of the aforementioned circular no. 32/2013 . Accordingly, non-compliance with the regulations would result in AED 1 being charged in capital (capital surcharge) for each dirham exceeding the large exposure limit prescribed in the regulations.

We were provided reasonable assurance for lowering the exposure relating to specific group of borrowers and increasing the capital base of the Bank in order to meet the requirement as prescribed in the circular issued by the CBUAE. We relied on the letter CBUAE/BSA/2020/4769 from CBUAE dated October 27, 2020 where the large exposure breaches arising from decrease in regulatory capital after October 1, 2018 will not be subject to the 1:1 deduction.

*(Independent auditor's report on Bank Saderat Iran - United Arab Emirates Branches continued on next page...)*

### **Responsibilities of management and those charged with governance for the financial statements**

Management of the Bank is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards (IFRSs), UAE Federal Law No. 14 of 2018 and the UAE Federal Law No. 2 of 2015, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Bank's financial reporting process.

### **Auditor's responsibilities for the audit of the financial statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with International Standards on Auditing (ISAs) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

*(Independent auditor's report on Bank Saderat Iran - United Arab Emirates Branches continued on next page...)*

**(Independent auditor's report on Bank Saderat Iran - United Arab Emirates Branches continued...)**

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

**Report on other legal and regulatory requirement**

As required by the UAE Federal Law No. 2 of 2015, we report that:

- i. We have obtained all the information we considered necessary for the purposes of our audit;
- ii. the financial statements of the Bank have been prepared and comply, in all material respects, with the applicable provisions of the UAE Federal Law No. 2 of 2015;
- iii. the Bank has maintained proper books of account, and records of the Bank are in agreement with it;
- iv. the Bank has not purchased any shares or stocks during the financial year;
- v. note 7 to the financial statements of the Bank discloses material related party transactions, the terms under which they were conducted;
- vi. based on the information that has been made available to us nothing has come to our attention which causes us to believe that the Bank has contravened during the financial year ended December 31, 2020 any of the applicable provisions of the UAE Federal Law No. 2 of 2015 as amended, which might have a material adverse effect on the Bank's financial position or/and the results of its operations.

Further, as required by the UAE Federal Law No. 14 of 2018, we report that we have obtained all the information and explanations we considered necessary for the purpose of our audit.

**Bank Saderat Iran**  
**United Arab Emirates Branches**

**Notes to the financial statements**

**Year ended: December 31, 2020**

All figures are expressed in thousands of U.A.E Dirhams

**1. General information**

**a. Legal status**

**Bank Saderat Iran** is incorporated in the Islamic Republic of Iran. In the United Arab Emirates, the Bank carries on the business of commercial banking through its following eight branches (collectively referred to as the "Bank"):

1. Al Maktoum Branch having license no. 206725 issued by Department of Economic Development, Government of Dubai dated October 6, 1969.
2. Murshid Bazar Branch having license no. 206597 issued by Department of Economic Development, Government of Dubai dated October 6, 1969.
3. Sheikh Zayed Branch having license no. 544166 issued by Department of Economic Development, Government of Dubai dated April 16, 2003.
4. Bur Dubai Branch having license no. 206454 issued by Department of Economic Development, Government of Dubai dated January 1, 1968.
5. Abu Dhabi Branch having license no. CN-1002012 issued by Department of Economic Development, Abu Dhabi Business Center dated December 31, 1969.
6. Al Ain Branch having license no. CN-1005792 issued by Department of Economic Development, Abu Dhabi Business Center dated October 13, 1972.
7. Sharjah Branch having license no. 12271 issued by Economic Development Department, Government of Sharjah dated July 22, 1974.
8. Ajman Branch having license no. 2692 issued by Municipality and Planning Department, Ajman dated March 11, 1978.

The Bank's registered office address in the United Arab Emirates is P.O. Box 4182, Dubai, United Arab Emirates.

The head office of the Bank is in Tehran, Islamic Republic of Iran.

These financial statements reflect the activities of the Bank in the United Arab Emirates only and exclude all transactions, assets and liabilities of the head office and other branches of the Bank.

The assigned capital of the Bank amounted to AED 2,350 million (December 31, 2019: AED 2,350 million).

**b. Business activities**

The Bank is engaged in the business of commercial banking.

**c. Management**

The Bank's regional office in Dubai Emirate is responsible for managing the operations of these UAE Branches.

**2. Application of new and revised International Financial Reporting Standards (IFRSs)**

The following standards, amendments and interpretations to published standards are mandatory for accounting year 2020:

IFRS 3 (October 2018)	<i>Business Combinations</i> (Business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 1, 2020)
IFRS 7 (September 2019)	<i>Financial Instruments: Disclosures</i> (effective from accounting periods beginning on or after January 1, 2020)
IFRS 9 (September 2019)	<i>Financial Instruments</i> (effective from accounting periods beginning on or after January 1, 2020)
IAS 1 (October 2018)	<i>Presentation of Financial Statements</i> (effective from accounting periods beginning from January 1, 2020)

IAS 8 (October 2018)	<i>Accounting Policies, Changes in Accounting Estimates and Errors</i> (effective from accounting periods beginning from January 1, 2020)
IAS 39 (September 2019)	<i>Financial Instruments: Recognition and Measurement</i> (effective for accounting periods beginning on or after January 1, 2020)

### Impact of initial application of new and revised International Financial Reporting Standards (IFRSs)

The Bank has applied the following amendments to IFRS issued by International Accounting Standards Board ("IASB") that are mandatorily effective for an accounting period that begins on or after January 1, 2020. The application of these amendments to IFRSs has not had any material impact on the amounts reported for the current year but may affect the accounting for the Bank's future transactions or arrangements.

### 3. Standards and interpretations in issue but not yet effective

At the date of authorisation of these financial statements, the following standards, amendments to existing standards and Interpretations were in issue but not yet effective and the Bank has not early adopted them:

IFRS 1 (May 2020)	<i>First-time Adoption of International Financial Reporting Standards</i> (effective from accounting periods beginning from January 1, 2022)
IFRS 3 (May 2020)	<i>Business Combinations</i> (effective from accounting periods beginning from January 1, 2022)
IFRS 4 (June 2020)	<i>Insurance Contracts</i> (effective from accounting periods beginning from January 1, 2023)
IFRS 4 (August 2020)	<i>Insurance Contracts</i> (effective from accounting periods beginning from January 1, 2021)
IFRS 7 (August 2020)	<i>Financial Instruments: Disclosures</i> (effective from accounting periods beginning from January 1, 2021)
IFRS 9 (May 2020)	<i>Financial Instruments</i> (effective from accounting periods beginning from January 1, 2022)
IFRS 9 (August 2020)	<i>Financial Instruments</i> (effective from accounting periods beginning from January 1, 2021)
IFRS 10 (December 2015)	<i>Consolidated Financial Statements</i> (effective date deferred indefinitely)
IFRS 16 (May 2020)	<i>Leases</i> (effective from accounting periods beginning from June 1, 2020)
IFRS 16 (August 2020)	<i>Leases</i> (effective from accounting periods beginning from January 1, 2021)
IFRS 16 ( March 2021)	<i>Leases</i> (effective from accounting periods beginning from April 1, 2021)
IFRS 16 (May 2020)	<i>Leases</i> (effective from accounting periods beginning from on or after January 1, 2022)
IFRS 17 (May 2017)	<i>Insurance Contracts</i> (effective from accounting periods beginning from January 1, 2023)
IFRS 17 (June 2020)	<i>Insurance Contracts</i> (effective from accounting periods beginning from January 1, 2023)
IAS 1 (January 2020)	<i>Presentation of Financial Statements</i> (effective from accounting periods beginning from January 1, 2023)
IAS 1 (July 2020)	<i>Presentation of Financial Statements</i> (effective from accounting periods beginning from January 1, 2023)
IAS 1 (February 2021)	<i>Presentation of Financial Statements</i> (effective from accounting periods beginning from January 1, 2023)
IAS 16 (May 2020)	<i>Property, Plant and Equipment</i> (effective from accounting periods beginning from January 1, 2022)
IAS 28 (May 2011)	<i>Investments in Associates and Joint Ventures</i> (effective date deferred indefinitely)

IAS 37 (May 2020)	<i>Provisions, Contingent Liabilities and Contingent Assets</i> (effective from accounting periods beginning from January 1, 2022)
IAS 39 (August 2020)	<i>Financial Instruments: Recognition and Measurement</i> (effective from accounting periods beginning from January 1, 2021)
IAS 41 (May 2020)	<i>Agriculture</i> (effective from accounting periods beginning from January 1, 2022)

The Management anticipates that these amendments will be adopted in the Bank's financial statements for the period beginning January 1, 2021 or as and when it is applicable. However, it is not practicable to provide a reasonable estimate of effects of the application of these standards until the Bank performs a detailed review.

#### 4. Basis of preparation and accounting policies

##### a. Statement of compliance

The financial statements are prepared in accordance with and comply with the requirements of each applicable International Financial Reporting Standard (IFRS) and each applicable Interpretation of the International Financial Reporting Interpretations Committee (IFRIC). IFRS also includes all International Accounting Standards (IAS) and Interpretations of Standing Interpretation Committee (SIC).

##### b. Basis of preparation

The financial statements have been prepared on the historical cost convention except measurement of derivative financial instruments at fair value, if any.

Historical cost is generally based on the fair value of the consideration given in exchange for assets.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or liability, the Bank takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value of measurement and/or disclosure purposes in statement of financial position is determined on such basis, except for share-based payment transactions that are within the scope of IFRS 2, leasing transactions that are within the scope of IFRS 16, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in IAS 2 or value in use in IAS 36.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- i. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- ii. Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- iii. Level 3 inputs are unobservable inputs for the asset or liability.

There were no transfers between level 1 and level 2 financial instruments during the current or prior year. The Bank did not have any financial instruments carried at fair value and classified within level 3 of fair value hierarchy at the current or prior year-end. Further, during the current or prior year there have been no purchases or sales of financial instruments carried at fair value and classified within level 3 of fair value hierarchy.

All the values in the financial statements are rounded to the nearest thousand (AED '000) except when otherwise indicated.

##### **Initial recognition and measurement**

When the fair value of financial assets and liabilities differs from the transaction price on initial recognition, the entity recognises the difference as follows:

- When the fair value is evidenced by a quoted price in an active market for an identical asset or liability (i.e. a Level 1 input) or based on a valuation technique that uses only data from observable markets, the difference is recognised as a gain or loss.
- In all other cases, the difference is deferred and the timing of recognition of deferred day one profit or loss is determined individually. It is either amortised over the life of the instrument, deferred until the instrument's fair value can be determined using market observable inputs, or realised through settlement.

### c. Accounting basis

These financial statements, except for the cash flow information are prepared under accrual basis of accounting. Under the accrual basis of accounting, transactions and events are recognised when they occur (and not as cash or its equivalent is received or paid) and they are recorded in the accounting records and reported in the financial statements of the periods to which they relate.

### d. Measurement basis

These financial statements have been prepared on historical cost convention except for the measurement of derivatives at fair value, if any.

### e. Financial assets

Financial assets are recognised in the Bank's statement of financial position when the Bank becomes a party to the contractual provisions of the instrument.

#### i) Measurement of financial assets

Financial assets are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets (other than financial assets at fair value through profit or loss) are added to the fair value of the financial assets on initial recognition. Transaction costs directly attributable to the acquisition of financial assets at fair value through profit or loss are recognised immediately in the statement of profit or loss and other comprehensive income.

All recognised financial assets that are within the scope of IFRS 9 are required to be measured subsequently at amortised cost or fair value on the basis of the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets. Specifically:

- debt instruments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding, are measured subsequently at amortised cost;
- debt instruments that are held within a business model whose objective is both to collect the contractual cash flows and to sell the debt instruments, and that have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding, are measured subsequently at fair value through other comprehensive income (FVTOCI);
- all other debt investments and equity investments are measured subsequently at fair value through profit or loss (FVTPL).

Despite the foregoing, the Bank may make the following irrevocable election/designation at initial recognition of a financial asset:

- the Bank may irrevocably elect to present subsequent changes in fair value of an equity investment that is neither held for trading nor contingent consideration recognised by an acquirer in a business combination in other comprehensive income; and
- the Bank may irrevocably designate a debt investment that meets the amortised cost or FVTOCI criteria as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

#### **Debt instruments at amortised cost or at FVTOCI**

The Bank assesses the classification and measurement of a financial asset based on the contractual cash flow characteristics of the asset and the Bank's business model for managing the asset.

For an asset to be classified and measured at amortised cost or at FVTOCI, its contractual terms should give rise to cash flows that are solely payments of principal and interest on the principal outstanding (SPPI).

For the purpose of SPPI test, principal is the fair value of the financial asset at initial recognition. That principal amount may change over the life of the financial asset (e.g. if there are repayments of principal). Interest consists of consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin. The SPPI assessment is made in the currency in which the financial asset is denominated.

Contractual cash flows that are SPPI are consistent with a basic lending arrangement. Contractual terms that introduce exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement, such as exposure to changes in equity prices or commodity prices, do not give rise to contractual cash flows that are SPPI. An originated or an acquired financial asset can be a basic lending arrangement irrespective of whether it is a loan in its legal form. An assessment of business models for managing financial assets is fundamental to the classification of a financial asset. The Bank determines the business models at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. The Bank's business model does not depend on management's intentions for an individual instrument, therefore the business model assessment is performed at a higher level of aggregation rather than on an instrument-by-instrument basis.

The financial assets classified as amortised cost consist of cash and cash equivalents, due from head office and its branches abroad, due from other banks, loans and advances and certain other assets.

The effective interest method is a method of calculating the amortised cost of a financial asset and of allocating interest income over the relevant period.

The amortised cost of a financial asset is the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, adjusted for any loss allowance. The gross carrying amount of a financial asset is the amortised cost of a financial asset before adjusting for any loss allowance.

When a debt investment measured at FVTOCI is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment. When an equity investment designated as measured at FVTOCI is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is subsequently transferred to retained earnings.

Debt instruments that are subsequently measured at amortised cost or at FVTOCI are subject to impairment.

#### **Financial assets at FVTPL**

Financial assets at FVTPL are:

- i) assets with contractual cash flows that are not SPPI;
- ii) assets that are held in a business model other than held to collect contractual cash flows or held to collect and sell; and
- iii) assets designated at FVTPL using the fair value option.

These assets are measured at fair value, with any gains/losses arising on remeasurement recognised in profit or loss.

In the current year, the Bank has not designated any debt investments that meet the amortised cost or FVTOCI criteria as measured at FVTPL.

#### **Cash and cash equivalents**

Cash and cash equivalents comprise balances with original maturities of three months or less from the date of acquisition and include cash and non restrictive current account balances with the CBUAE.

#### **ii) Foreign exchange gains and losses**

The carrying amount of financial assets that are denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting period. Specifically;

- for financial assets measured at amortised cost that are not part of a designated hedging relationship, exchange differences are recognised in profit or loss for the year;
- for debt instruments measured at FVTOCI that are not part of a designated hedging relationship, exchange differences on the amortised cost of the debt instrument are recognised in profit or loss for the year. Other exchange differences are recognised in other comprehensive income in the investments revaluation reserve;
- for financial assets measured at FVTPL that are not part of a designated hedging relationship, exchange differences are recognised in profit or loss for the year; and
- for equity instruments measured at FVTOCI, exchange differences are recognised in other comprehensive income in the investments revaluation reserve.

### iii) **Impairment of financial assets**

The Bank recognises a loss allowance for expected credit losses on investments in debt instruments that are measured at amortised cost or at FVTOCI as well as on financial guarantee contracts. The amount of expected credit losses is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument. No impairment loss is recognised for investments in equity instruments which are carried at FVTPL.

For all financial instruments, the Bank recognises lifetime ECL when there has been a significant increase in credit risk since initial recognition. If, on the other hand, the credit risk on the financial instrument has not increased significantly since initial recognition, the Bank measures the loss allowance for that financial instrument at an amount equal to 12-month ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition instead of on evidence of a financial asset being credit-impaired at the reporting date or an actual default occurring.

The Bank considers whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period. To assess whether there is a significant increase in credit risk the Bank compares the risk of a default occurring on the asset as at the reporting date with the risk of default as at the date of initial recognition.

In making this assessment, the Bank considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward looking information that is available without undue cost or effort.

Especially the following indicators are incorporated:

- an actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating;
- actual or forecast significant adverse changes in business, financial or economic conditions that are expected to cause a significant change to the borrower's ability to meet its obligations;
- actual or expected significant deterioration in the operating results of the borrower;
- significant increases in credit risk on other financial instruments of the same borrower;
- an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations;
- significant changes in the value of the collateral supporting the obligation or in the quality of third-party guarantees or credit enhancements; and
- significant changes in the expected performance and behaviour of the borrower, including changes in the payment status of borrowers in the Bank and changes in the operating results of the borrower.

Regardless of the analysis above, a significant increase in credit risk is presumed if a debtor is more than 30 days past due in making a contractual payment. A default on a financial asset is when the counterparty fails to make contractual payments within 60 days of when they fall due. The Bank regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

#### **Credit - impaired financial assets**

A financial asset is 'credit impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Credit impaired financial assets are referred to as Stage 3 assets. Evidence of credit impairment includes observable data about the following events which indicates the borrower is in significant financial difficulty.

- The borrower is in long-term forbearance
- The borrower is deceased
- The borrower is insolvent
- The borrower is in breach of financial covenant(s)
- An active market for that financial asset has disappeared because of financial difficulties
- Concessions have been made by the lender relating to the borrower's financial difficulty
- It is becoming probable that the borrower will enter bankruptcy
- Financial assets are purchased or originated at a deep discount that reflects the incurred credit losses.

It may not be possible to identify a single discrete event. Instead, the combined effect of several events may have caused financial assets to become credit impaired. The Bank assesses whether debt instruments that are financial assets measured at amortised cost or FVTOCI are credit impaired at each reporting date. To assess if sovereign and corporate debt instruments are credit impaired, the Bank considers factors such as bond yields, credit ratings and the ability of the borrower to raise funding.

A loan is considered credit impaired when a concession is granted to the borrower due to a deterioration in the borrower's financial condition, unless there is evidence that as a result of granting the concession the risk of not receiving the contractual cash flows has reduced significantly and there are no other indicators of impairment. For financial assets where concessions are contemplated but not granted, the asset is deemed credit impaired when there is observable evidence of credit impairment including meeting the definition of default. The definition of default (see below) includes unlikelihood to pay indicators and a backstop if amounts are overdue for 30 days or more.

#### ***Purchased or originated credit - impaired financial assets***

Purchased or originated credit-impaired ('POCI') financial assets are the assets that are credit-impaired at initial recognition. The Bank calculates the credit-adjusted effective interest rate, which is calculated based on the amortised cost of the financial asset instead of its gross carrying amount and incorporates the impact of expected credit losses in estimated future cash flows.

#### ***Definition of default***

Critical to the determination of ECL is the definition of default. The definition of default is used in measuring the amount of ECL and in the determination of whether the loss allowance is based on 12 month or lifetime ECL, as default is a component of the probability of default (PD) which affects both the measurement of ECLs and the identification of a significant increase in credit risk.

The Bank considers the following as constituting an event of default:

- the borrower is more than 60 days past due on its contractual payments;
- the borrower is unlikely to pay its credit obligations to the Bank in full.

The definition of default is appropriately tailored to reflect different characteristics of different types of assets.

When assessing if the borrower is unlikely to pay its credit obligation, the Bank takes into account both qualitative and quantitative indicators. The information assessed depends on the type of the asset, for example, in corporate lending a qualitative indicator used is the breach of covenants, which is not relevant for retail lending. Quantitative indicators, such as overdue status and non-payment on another obligation of the same counterparty are key inputs in this analysis. The Bank uses a variety of sources of information to assess default which are either developed internally or obtained from external sources.

#### ***Measurement of expected credit loss (ECL)***

The Expected Credit Loss (ECL) is measured on either a 12-month (12M) or Lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of the Probability of Default (PD), Exposure at Default (EAD), and Loss Given Default (LGD), defined as follows:

- The PD represents the likelihood of a borrower defaulting on its financial obligation, either over the next 12 months (12M PD), or over the remaining lifetime (Lifetime PD) of the obligation.
- EAD is based on the amounts the Bank expects to be owed at the time of default, over the next 12 months (12M EAD) or over the remaining lifetime (Lifetime EAD). For example, for a revolving commitment, the Bank includes the current drawn balance plus any further amount that is expected to be drawn up to the current contractual limit by the time of default, should it occur.
- Loss Given Default (LGD) represents the Bank's expectation of the extent of loss on a defaulted exposure. LGD varies by type of counterparty, type and seniority of claim and availability of collateral or other credit support. LGD is expressed as a percentage loss per unit of exposure at the time of default (EAD). LGD is calculated on a 12-month or lifetime basis, where 12-month LGD is the percentage of loss expected to be made if the default occurs in the next 12 months and Lifetime LGD is the percentage of loss expected to be made if the default occurs over the remaining expected lifetime of the loan.

The ECL is determined by projecting the PD, LGD and EAD for each future month and for each individual exposure or collective segment. These three components are multiplied together and adjusted for the likelihood of survival (i.e. the exposure has not prepaid or defaulted in an earlier month). This effectively calculates an ECL for each future month, which is then discounted back to the reporting date and summed. The discount rate used in the ECL calculation is the original effective interest rate or an approximation thereof.

The Lifetime PD is developed by applying a maturity profile to the current 12 month PD. The maturity profile looks at how defaults develop on a portfolio from the point of initial recognition throughout the lifetime of the loans. The maturity profile is based on historical observed data and is assumed to be the same across all assets within a portfolio and credit grade band. This is supported by historical analysis.

The 12-month and lifetime EADs are determined based on the expected payment profile, which varies by product type.

- For amortising products and bullet repayment loans, this is based on the contractual repayments owed by the borrower over a 12month or lifetime basis. This will also be adjusted for any expected overpayments made by a borrower. Early repayment/refinance assumptions are also incorporated into the calculation.

- For revolving products, the exposure at default is predicted by taking current drawn balance and adding a "credit conversion factor" which allows for the expected draw down of the remaining limit by the time of default. These assumptions vary by product type and current limit utilisation band, based on analysis of the Bank's recent default data.

The 12-month and lifetime LGDs are determined based on the factors which impact the recoveries made post default. These vary by product type.

- For secured products, this is primarily based on collateral type and projected collateral values, historical discounts to market/book values due to forced sales, time to repossession and recovery costs observed.

- For unsecured products, LGD's are typically set at product level due to the limited differentiation in recoveries achieved across different borrowers. These LGD's are influenced by collection strategies, including contracted debt sales and price.

Forward-looking economic information is also included in determining the 12-month and lifetime PD, EAD and LGD. These assumptions vary by product type.

The assumptions underlying the ECL calculation – such as how the maturity profile of the PDs and how collateral values change etc. – are monitored and reviewed on a quarterly basis.

For unfunded exposures, ECL is measured as follows:

- for undrawn loan commitments, the ECL is the difference between the present value and the contractual cash flows that are due to the Bank if the holder of the commitment draws down the loan and the cash flows that the Bank expects to receive if the loan is drawn down; and

- for financial guarantee contracts, the ECL is the expected payments to reimburse the holder of the guaranteed debt instrument less any amounts that the Bank expects to receive from the holder, the debtor or any other party.

No impairment loss is recognised on equity investments.

#### **iv) Presentation of allowance for ECL in the financial statements**

Loss allowances for ECL are presented in the financial statements as follows:

- for financial assets measured at amortised cost (balances with CBUAE, due from head office and its branches abroad, due from other banks, loans and advances and other financial assets): as a deduction from the gross carrying amount of the assets;

- for debt instruments measured at FVTOCI: as part of revaluation reserve of investments designated at FVTOCI and recognised in other comprehensive income; and

- for loan commitments and financial guarantee contracts: as a provision.

#### **v) Modification of financial assets**

The Bank sometimes modifies the terms of loans provided to customers due to commercial renegotiations, or for distressed loans, with a view to maximising recovery.

Such restructuring activities include extended payment term arrangements, payment holidays and payment forgiveness. Restructuring policies and practices are based on indicators or criteria which, in the judgement of management, indicate that payment will most likely continue. These policies are kept under continuous review. Restructuring is most commonly applied to term loans.

When a financial asset is modified, the Bank assesses whether this modification results in derecognition. In accordance with the Bank's policy a modification results in derecognition when it gives rise to substantially different terms. The Bank considers the qualitative factors (i.e. contractual cash flows after modification, change in currency or counterparty, interest rates, maturity, covenants) and a quantitative assessment (i.e. compare the present value of the remaining contractual cash flows under the original terms with the contractual cash flows under the revised terms, discounted at the original effective interest) to determine the substantially different terms.

In case where the financial asset is derecognised, the loss allowance for ECL is remeasured at the date of derecognition to determine net carrying amount of the asset at that date. The difference between this revised carrying amount and the fair value of the new financial asset with the new terms will lead to a gain or loss on derecognition. The new financial asset will have a loss allowance measured based on 12-month ECL except in the rare occasions where the new loan is considered to be originated credit impaired. This applies only in the case where the fair value of the new loan is recognised at a significant discount to its revised par amount because there remains a high risk of default which has not been reduced by the modification. The Bank monitors credit risk of modified financial assets by evaluating qualitative and quantitative information, such as if the borrower is in past due status under the new terms.

When the contractual terms of a financial asset are modified and the modification does not result in derecognition, the Bank determines if the financial asset's credit risk has increased significantly since initial recognition by comparing the credit rating at initial recognition and the original contractual terms; with credit rating at the reporting date based on the modified terms.

Where a modification does not lead to derecognition the Bank calculates the modification gain/loss comparing the gross carrying amount before and after the modification (excluding the ECL allowance). Then the Bank measures ECL for the modified asset, where the expected cash flows arising from the modified financial asset are included in calculating the expected cash shortfalls from the original asset.

The risk of default of such assets after modification is assessed at the reporting date and compared with the risk under the original terms at initial recognition, when the modification is not substantial and so does not result in derecognition of the original asset. The Bank monitors the subsequent performance of modified assets. The Bank may determine that the credit risk has significantly improved after restructuring, so that the assets are moved from Stage 3 or Stage 2 (Lifetime ECL) to Stage 1 (12-month ECL). This is only the case for assets which have performed in accordance with the new terms for three consecutive months or more.

The Bank continues to monitor if there is a subsequent significant increase in credit risk in relation to such assets through the use of specific models for modified assets.

#### **vi) Write-offs**

The Bank writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include (i) ceasing enforcement activity and (ii) where the Bank's recovery method is foreclosing on collateral and the value of the collateral is such that there is no reasonable expectation of recovering in full.

The Bank may write-off financial assets that are still subject to enforcement activity. The outstanding contractual amounts of such assets written off during the year ended December 31, 2020 disclosed in note 10d. The Bank still seeks to recover amounts it is legally owed in full, but which have been partially written off due to no reasonable expectation of full recovery.

#### **vii) Derecognition of financial assets**

The Bank derecognises a financial asset only when the contractual rights to the cash flows from the asset expire; or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Bank neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Bank recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Bank retains substantially all the risks and rewards of ownership of a transferred financial asset, the Bank continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in comprehensive income.

#### **f. Property, plant and equipment**

Land is not depreciated. All other property, plant and equipment, are stated at historical cost less accumulated depreciation and accumulated impairment losses, if any.

The Bank recognizes right-of-use assets at the commencement date of the lease (i.e. the date the underlying asset is available for use) for the leases not in existence at the date of initial application. Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any re-measurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Unless the Bank is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognized right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life and the lease term. Right-of-use assets are subject to impairment.

Other property, plant and equipment, are stated at historical cost less accumulated depreciation and accumulated impairment losses, if any.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Bank and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the statement of profit or loss and other comprehensive income during the financial period in which they are incurred.

Depreciation is recognised so as to write off the cost of assets less their residual values over their useful lives, using the straight-line method as follows:

Buildings	20 Years
Leasehold improvements	Lower of lease terms and 4 years
Furniture, fixtures, fittings and office equipment	1 - 4 Years
Motor vehicles	3 Years
Right-of-use asset (refer note 4p)	10 years

The estimated useful lives, residual values and depreciation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis.

The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in the statement of profit or loss and other comprehensive income.

**g. Impairment of non-financial assets**

Assets that have an indefinite useful life, are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

**h. Financial liabilities and equity instruments issued by the Bank**

***Classification as debt or equity***

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

***i) Equity instruments***

An equity instrument is assigned capital from head office that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Bank are recorded at the proceeds received, net of direct issue costs.

***ii) Financial liabilities***

Financial liabilities are recognised in the Bank's statement of financial position when the Bank becomes a party to the contractual provisions of the instrument.

Financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to issue of financial liabilities (other than financial liabilities at fair value through profit or loss) are deducted from the fair value of financial liabilities on initial recognition. Transaction costs directly attributable to the acquisition of financial liabilities at fair value through profit or loss are recognised immediately in the statement of profit or loss and other comprehensive income.

All financial liabilities are measured subsequently at amortised cost using the effective interest method.

The financial liabilities classified as amortised cost consist of due to other banks, customer deposits, due to head office and its branches abroad and other liabilities.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

### **iii) Foreign exchange gains and losses**

The carrying amount of financial liabilities that are denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting period. Specifically;

- for financial liabilities measured at amortised cost that are not part of a designated hedging relationship, exchange differences are recognised in profit or loss for the year; and
- for financial liabilities measured at amortised cost that are part of a designated hedging relationship, foreign exchange gains and losses are recognised in other comprehensive income and accumulated in a separate component of equity.

### **iv) Derecognition of financial liabilities**

The Bank derecognises financial liabilities when, and only when, the Bank's obligations are discharged, cancelled or they expired. Where an existing financial liability is replaced by another from same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the comprehensive income.

The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognised in comprehensive income.

### **i. Provision for employees' end of service indemnity**

With respect to its national employees, the Bank makes contributions to a pension fund established by the General Pension and Social Security Authority calculated as percentage of employees' salaries. The obligations of the Bank are limited to these contributions, which are expensed when due.

The Bank provides end of service benefits to their expatriate employees. The entitlement to these benefits is usually based upon the employees' length of service and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment and are not less than the liability arising under the UAE Labour Laws. For expatriate staff employed before January 1, 1980, a contribution of 7% deducted from their basic salary restricted to maximum of AED 290 per month towards Provident Fund. The Bank contributes double of this amount and combines it with the employees contribution for employees end of service indemnity.

### **j. Provisions**

A provision is recognised in the financial position when the Bank has a legal or constructive obligation as a result of a past event and it is probable that an outflow of economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

### **k. Financial guarantee contracts and loan commitments**

Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due, in accordance with the terms of a debt instrument. Such financial guarantees are given to banks, financial institutions and others on behalf of customers to secure loans, overdrafts and other banking facilities.

Financial guarantee contracts are initially measured at fair value and subsequently measured at the higher of:

- The amount of the loss allowance determined in accordance with IFRS 9; and
- The premium received on initial recognition less income recognised in accordance with the principles of IFRS 15.

Loan commitments provided by the Bank are measured at the amount of the loss allowance. The Bank has not provided any commitment to provide loans at a below-market interest rate, or that can be settled net in cash or by delivering or issuing another financial instrument.

For loan commitments and financial guarantee contracts, the loss allowance is recognised as a provision. However, for contracts that include both a loan and an undrawn commitment and the Bank cannot separately identify the expected credit losses on the undrawn commitment component from those on the loan component, the expected credit losses on the undrawn commitment are recognised together with the loss allowance for the loan. To the extent that the combined expected credit losses exceed the gross carrying amount of the loan, the expected credit losses are recognised as a provision.

## I. Taxation

### *Income Tax*

Taxation is provided for in accordance with local regulations for assessment of tax on the branches of foreign banks operating in the United Arab Emirates.

Taxation for the year comprises current and deferred tax, it is recognised in comprehensive income except to the extent that it relates to items recognised directly in equity or in other comprehensive income.

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. It is measured using tax rate enacted at the reporting date.

Deferred income tax is determined using the liability method on all temporary differences at the reporting date.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is expected to be realised or liability is expected to be settled, based on laws that have been enacted at the reporting date.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised.

### *Value Added Tax*

Expenses and assets are recognised net of the amount of VAT, except:

- When the VAT incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the VAT is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable,
- When receivables and payables are stated with the amount of VAT included.

The net amount of VAT recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the statement of financial position.

## m. Statutory reserve

Article 239 of the UAE Federal Law No. (2) of 2015 requires that 10% of the net profit is transferred to a special reserve until such reserve equals 50% of the capital. This reserve is not available for distribution.

## n. Revenue recognition

### *i) Interest income and expense*

Interest income and expense for all interest-bearing financial instruments is calculated by applying the effective interest rate (refer note 4e) to the gross carrying amount of the financial instrument. For financial assets that have subsequently become credit-impaired (or stage 3), for which interest accrual is calculated by applying the effective interest rate to their amortised cost (i.e. net of the expected credit loss provision) are recognized directly to suspense in accordance with the regulation of CBUAE.

When the recovery of interest or principal is in doubt, the recognition of income ceases and any further income accruals are taken directly to suspense in accordance with the regulations of the CBUAE.

## ii) Revenue from contracts with customers

Under IFRS 15, revenue is recognised when a customer receives the services. Determining the timing of the transfer of control, at a point in time or over time, requires judgement.

The Bank recognises revenue from rendering of services based on a five step model as set out in IFRS 15:

*Step 1 - Identify the contract(s) with a customer:*

A contract is defined as an agreement between two or more parties that creates enforceable rights and obligations and sets out the criteria for every contract that must be met.

*Step 2 - Identify the performance obligations in the contract:*

A performance obligation is a promise in a contract with a customer to render services to the customer.

*Step 3 - Determine the transaction*

The transaction price is the amount of consideration to which the Bank expects to be entitled in exchange for rendering services to a customer, excluding amounts collected on behalf of third parties.

*Step 4 - Allocate the transaction price to the performance obligations in the contract:*

For a contract that has more than one performance obligation, the Bank will allocate the transaction price to each performance obligation in an amount that depicts the amount of consideration to which the Bank expects to be entitled in exchange for satisfying each performance obligation.

*Step 5 - Recognise revenue when (or as) the entity satisfies a performance obligation:*

The Bank satisfies a performance obligation and recognises revenue over time, if one of the following criteria is met:

- i. The customer simultaneously receives and consumes the benefits provided by the Bank's performance as the Bank performs; or
- ii. The Bank's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
- iii. The Bank's performance does not create an asset with an alternative use to the Bank and the entity has an enforceable right to payment for performance completed to date.

For performance obligations where one of the above conditions are not met, revenue is recognised at the point in time at which performance obligation is satisfied.

When the Bank satisfies a performance obligation by rendering the promised services, it creates a contract asset based on the amount of consideration earned by the performance. Where the amount of consideration received from a customer exceeds the amount of revenue recognised, this gives rise to a contract liability.

### **Fees and commission income**

The Bank earns fee and commission income from a diverse range of services it provides to its customers. Fee income can be divided into the following two categories:

- Fees earned for the provision of services over a period of time are accrued over that period. These fees include commission income, custody and other management and advisory fees. Loan commitment fees for loans that are likely to be drawn down and other credit-related fees are deferred (together with any incremental costs) and recognised as an adjustment to the effective interest rate on the loan. When it is unlikely that a loan will be drawn down, the loan commitment fees are recognised over the commitment period on a straight-line basis.
- Fees or components of fees that are linked to a certain performance are recognised after fulfilling the corresponding criteria.

## o. Foreign currencies transactions

The financial statements of the Bank are presented in the currency of the primary economic environment in which the Bank operates (its functional currency). For the purpose of the financial statements, the results and financial position of the Bank are expressed in UAE Dirhams, which is the functional currency of the Bank and the presentation currency for these financial statements.

- i. Transactions in foreign currencies are converted into UAE Dirhams at rates ruling when entered into.
- ii. Monetary foreign currency balances are converted into UAE Dirhams at the rate of exchange ruling at the financial position date.
- iii. Resultant gain or loss is taken to statement of profit or loss and other comprehensive income for the year.

iv. Non-monetary items measured at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined.

v. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

#### p. Leases

IFRS 16 requires the recognition of a right-of-use asset and a lease liability at commencement for all leases, except for short-term leases and leases of low value assets.

##### i. Bank as a lessee

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- variable lease payment that are based on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable by the Bank under residual value guarantees;
- the exercise price of a purchase option if the Bank is reasonably certain to exercise that option; and
- payments of penalties for terminating the lease, if the lease term reflects the Bank exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the Bank, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

To determine the incremental borrowing rate, the Bank:

- where possible, uses recent third-party financing received by the individual lessee as a starting point, adjusted to reflect changes in financing conditions since third party financing was received;
- uses a build-up approach that starts with a risk-free interest rate adjusted for credit risk for leases held by the Bank, which does not have recent third party financing, and
- makes adjustments specific to the lease term, country, currency and security.

Lease payments are allocated between principal and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor. Leased assets may not be used as security for borrowing purposes.

Leases of property, plant and equipment classified as operating leases are recognised as a right-of-use asset as described in note 4f and a corresponding liability measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate.

Leases of property, plant and equipment classified as a finance leases are recognised at the carrying amount of the lease liability immediately before transition as the carrying amount of the right-of-use asset and the lease liability at the date of initial application. The measurement principles of IFRS 16 are only applied after that date. The re-measurements to the lease liabilities were recognised as adjustments to the related right-of-use assets immediately after the date of initial application.

Contracts may contain both lease and non-lease components. The Bank allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices. However, for leases of real estate for which the Bank is a lessee, it has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

### ***Extension and termination options***

Extension and termination options are included in a number of property and equipment leases across the Bank. These are used to maximise operational flexibility in terms of managing the assets used in the Bank's operations. The extension and termination options held are exercisable either by the Bank or by the respective lessor.

### ***Residual value guarantees***

To optimise lease costs during the contract period, the Bank sometimes provides residual value guarantees in relation to equipment leases, if any.

### ***Short-term leases and leases of low value asset***

For short-term (defined as leases with a lease term of 12 months or less) and leases of low value asset, the Bank recognises the lease payments as an operating lease on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed. This expense is presented within other expenses in the statement of profit and loss and other comprehensive income.

As a practical expedient, IFRS 16 permits a lessee not to separate non-lease component, and instead account for any lease and associated non-lease component as a single arrangement. The Bank has used this practical expedient.

The Bank has presented right of use asset within 'Property, plant and equipment' and lease liabilities within 'Other liabilities' in the statement of financial position.

## **ii. Bank as a lessor**

### ***Operating lease***

Rental income from operating leases is recognised on a straight line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operational lease are added to the carrying amount of the leased asset and recognised on a straight line basis over the lease term.

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement at inception date of whether the fulfilment of the arrangement is dependent on the use of a specific asset or the arrangement conveys a right to use the asset.

## **q. Customer acceptances**

Customer acceptances arise when the Bank is under an obligation to make payments against documents drawn under letters of credit. Acceptances specify the amount of money, the date and the person to which the payment is due. Customer acceptances are recognised as a financial liability in the statement of financial position with a corresponding contractual right of reimbursement from the customer recognised as a financial asset. Therefore, commitments in respect of acceptances have been accounted for as financial assets and financial liabilities.

## **r. Trade and settlement date accounting**

All "regular way" purchases and sales of financial assets are recognition on the settlement date, i.e. the date that the asset is delivered to the counterparty. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the timeframe generally established by regulation or convention in the market place.

## **s. Fiduciary assets**

Assets held in trust or in a fiduciary capacity are not treated as assets of the Bank and accordingly are not included in these financial statements.

## **t. Offsetting**

Financial assets and financial liabilities are only offset and the net amount reported in the financial position when there is a legally enforceable right to set off the recognised amounts and the Bank intends to either settle on a net basis, or to realise the asset and settle liability simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the statement of financial position.

## 5. Critical accounting judgments and key sources of estimation uncertainty

The preparation of financial statements in conformity with IFRSs requires management to make judgments, assumptions, and other key sources of estimation uncertainty at the financial position date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities and income and expenses within the next financial year, as discussed below:

Estimates and judgment are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

### a. Critical accounting judgments

The management has exercised its judgment in the process of applying the Company's accounting policies. The following are the significant judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty which were the same as those that were applied in the preparation of the financial statements of the Company as at end for the year ended December 31, 2019.

#### i) *Business model assessment*

Classification and measurement of financial assets depends on the results of the SPPI and the business model test (please see financial assets sections of note 4). The Bank determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgement reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed and how the managers of the assets are compensated. The Bank monitors financial assets measured at amortised cost or fair value through other comprehensive income that are derecognised prior to their maturity to understand the reason for their disposal and whether the reasons are consistent with the objective of the business for which the asset was held. Monitoring is part of the Bank's continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets. No such changes were required during the periods presented.

#### ii) *Revenue recognition on refinanced bills and overdue bills discounted*

The management had made judgment for the effective rate of interest at which interest income on bill discount overdue receivables was being earned and for the period of overdue interest. The effective rate of interest was decided based on the then market trends, Bank's historical interest rates trend, Bank's rate of interest negotiation capability, then economical and political environment. Any variation in effective rate of interest, period of interest or/and collections of such interest income then accounted in these financial statements will impact the performance of the period in which actually realised. During the year, the Bank has not incurred any impairment loss (December 31, 2019: Nil) due to variation in the actual effective rate of interest than accounted effective rate of interest in earlier years.

#### iii) *Identifying whether a contract includes a lease*

At inception of a contract, an entity is required to assess whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. A 'period of time' may be described in terms of the amount of use of an identified asset.

#### iv) *Determining the lease term*

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

The assessment is reviewed if a significant event or a significant change in circumstances occurs which affects this assessment and that is within the control of the lessee.

#### v) *Amount payable under residual value guarantees (if any)*

The Bank initially estimates and recognises amounts expected to be payable under residual value guarantees as part of the lease liability. The amounts are reviewed, and adjusted if appropriate, at the end of each reporting period.

## b. Key sources of estimation uncertainty

The Bank makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. However, management opines that following are the estimates and assumptions that have a significant risk of causing a material adjustments to the carrying amounts of assets and liabilities within next financial year.

### i) *Going concern*

The Bank's management has made an assessment of the Bank's ability to continue as a going concern and is satisfied that the Bank has the resources to continue in business for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the Bank's ability to continue as a going concern, Therefore, the financial statements continue to be prepared on the ongoing basis. Refer also note 30 and 31.

### ii) *Measurement of the expected credit loss allowance*

The measurement of the expected credit loss allowance for financial assets measured at amortised cost and FVOCI is an area that requires the use of complex models and significant assumptions about future economic conditions and credit behaviour (e.g. the likelihood of customers defaulting and the resulting losses). Explanation of the inputs, assumptions and estimation techniques used in measuring ECL is further detailed in note 4e, which also sets out key sensitivities of the ECL to changes in these elements.

A number of significant judgements are also required in applying the accounting requirements for measuring ECL, such as:

#### ***Assessment of significant increase in credit risk***

The Bank monitors all financial assets, issued loan commitments and financial guarantee contracts that are subject to the impairment requirements to assess whether there has been a significant increase in credit risk since initial recognition. If there has been a significant increase in credit risk, the Bank will measure the loss allowance based on lifetime rather than 12-month ECL.

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Bank compares the risk of a default occurring on the financial instrument at the reporting date based on the remaining maturity of the instrument with the risk of a default occurring that was anticipated for the remaining maturity at the current reporting date when the financial instrument was first recognised. In making this assessment, the Bank considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort, based on the Bank's historical experience and expert credit assessment including forward-looking information.

Multiple economic scenarios form the basis of determining the probability of default at initial recognition and at subsequent reporting dates. Different economic scenarios will lead to a different probability of default. It is the weighting of these different scenarios that forms the basis of a weighted average probability of default that is used to determine whether credit risk has significantly increased.

For corporate lending, forward-looking information includes the future prospects of the industries in which the Bank's counterparties operate, obtained from economic expert reports, financial analysts, governmental bodies and other similar organisations, as well as consideration of various internal and external sources of actual and forecast economic information. For retail lending forward-looking information includes the same economic forecasts as corporate lending with additional forecasts of local economic indicators, particularly for regions with a concentration to certain industries, as well as internally generated information of customer payment behaviour.

The Bank allocates its counterparties to a relevant internal credit risk grade depending on their credit quality. The Bank considers the probability of default upon initial recognition of asset and whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period. To assess whether there is a significant increase in credit risk the Bank compares the risk of a default occurring on the asset as at the reporting date with the risk of default as at the date of initial recognition. It considers available reasonable and supportive forwarding-looking information. Especially the following indicators are incorporated:

- internal risk grade;
- external credit rating (as far as available);
- actual or expected significant adverse changes in business, financial or economic conditions that are expected;
- to cause a significant change to the borrower's ability to meet its obligations;
- actual or expected significant changes in the operating results of the borrower;
- significant increases in credit risk on other financial instruments of the same borrower;

- significant changes in the value of the collateral supporting the obligation or in the quality of third party guarantees or credit enhancements;
- significant changes in the actual or expected performance and behaviour of the borrower, including changes
  - i. in the payment status of borrowers in the Bank and changes in the operating results of the borrower; and
  - ii. macroeconomic information (such as oil prices or GDP) is incorporated as part of the internal rating model.

The qualitative factors that indicate significant increase in credit risk are reflected in PD models on a timely basis.

However, the Bank still considers separately some qualitative factors to assess if credit risk has increased significantly. For corporate lending there is particular focus on assets that are included on a 'watch list' given an exposure is on a watch list once there is a concern that the creditworthiness of the specific counterparty has deteriorated.

ECLs are measured as an allowance equal to 12-month ECL for stage 1 assets, or lifetime ECL for stage 2 or stage 3 assets. An asset moves to stage 2 when its credit risk has increased significantly since initial recognition. IFRS 9 does not define what constitutes a significant increase in credit risk. In assessing whether the credit risk of an asset has significantly increased the Bank takes into account qualitative and quantitative reasonable and supportable forward-looking information.

#### *Establishing group of assets with similar credit risk characteristics*

When ECLs are measured on a collective basis, the financial instruments are grouped on the basis of shared risk characteristics (e.g. instrument type, credit risk grade, collateral type, date of initial recognition, remaining term to maturity, industry, geographic location of the borrower, etc.). The Bank monitors the appropriateness of the credit risk characteristics on an ongoing basis to assess whether they continue to be similar. This is required in order to ensure that should credit risk characteristics change there is appropriate re-segmentation of the assets. This may result in new portfolios being created or assets moving to an existing portfolio that better reflects the similar credit risk characteristics of that Bank of assets. Re-segmentation of portfolios and movement between portfolios is more common when there is a significant increase in credit risk (or when that significant increase reverses) and so assets move from 12-month to lifetime ECLs, or vice versa, but it can also occur within portfolios that continue to be measured on the same basis of 12-month or lifetime ECLs but the amount of ECL changes because the credit risk of the portfolios differ.

#### *Models and assumptions used*

The Bank uses various models and assumptions in measuring ECL of financial assets. Judgement is applied in identifying the most appropriate model for each type of asset, as well as for determining the assumptions used in these models, including assumptions that relate to key drivers of credit risk.

- *Establishing the number and relative weightings of forward - looking scenarios for each type of product/market and determining the forward looking information relevant to each scenario*

When measuring ECL the Bank uses reasonable and supportable forward-looking information, which is based on assumptions for the future movement of different economic drivers and how these drivers will affect each other.

- *Probability of default*

PD constitutes a key input in measuring ECL. PD is an estimate of the likelihood of default over a given time horizon, the calculation of which includes historical data, assumptions and expectations of future conditions.

- *Loss given default*

LGD is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, taking into account cash flows from collateral and integral credit enhancements.

### **iii) Property, plant and equipment**

Management determines the estimated useful life and related depreciation charges for its leasehold improvements based on their best estimate. This estimate is based on, among other factors, an assumption that the Bank will renew its annual lease over the estimated useful life. It could change significantly should the annual lease not be renewed. Management will increase the depreciation charge where useful life is less than the previously estimated life.

The cost of other property, plant and equipment is depreciated over the estimated useful life, which is based on expected usage of the asset, expected physical wear and tear, the repair and maintenance program and technological obsolescence arising from changes and the residual value. The management has not considered any residual value as it is deemed immaterial.

#### iv) Impairment of non-financial assets

The Bank assesses whether there are any indicators of impairment for all non-financial assets at each reporting date. Non-financial assets are tested for impairment when there are indicators that the carrying amounts may not be recoverable. Management determines impairment on non-financial assets based on either the fair value or value in use, as appropriate. When value in use calculations are undertaken, management must estimate the expected future cash flows from the asset or cash-generating unit and choose a suitable discount rate in order to calculate the present value of those cash flows.

#### v) Tax exposures

In determining the amount of current and deferred tax, the Bank considers the impact of tax exposures, including whether additional taxes and interest may be due. There are certain transactions and computations for which the ultimate tax determination is uncertain during the ordinary course of business. Where the final tax outcome of these matters is different from the amounts that were initially recognised, such differences will impact the tax provisions in the period in which such determination is made. This assessment relies on the estimates and assumptions and may involve a series of judgments about future events. New information may become available that causes the Bank to change its judgment regarding the adequacy of the existing tax liabilities; such changes to tax liabilities would impact tax expense in the period in which such a determination is made.

#### vi) Impairment of overdue export bills discounted

The Bank's accounting policy for impairment of financial assets is described in note 4e. Since the overdue export bills discounted are backed by the other Banks, the LGD is taken as zero. The export bills discounted are overdue because of the sanctions imposed on the Bank.

#### vii) Employees' end of service indemnity

The provision for liability towards employees' end of service indemnity is calculated on the assumption that all the employees were to leave as at the date of the statement of financial position. The management of the Bank is of the opinion that no significant difference would have arisen had the liability been calculated on an actuarial basis as salary inflation and discount rates are likely to have approximately equal and opposite effects.

#### viii) Other provisions and liabilities

Other provisions and liabilities are recognized in the year only to the extent management considers it probable that there will be a future outflow of funds resulting from past operations or events and the amount of cash outflow can be reliably estimated. The timing of recognition and quantification of the liability require the application of judgement to existing facts and circumstances, which can be subject to change. Since the actual cash outflows can take place in subsequent years, the carrying amounts of provisions and liabilities are reviewed regularly and adjusted to take account of changing facts and circumstances. A change in estimate of a recognized provision or liability would result in a charge or credit to the statement of profit or loss and other comprehensive income in the year in which the change occurs.

#### ix) Estimating the incremental borrowing rate

The Bank cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the Bank would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Bank 'would have to pay', which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease. The Bank estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific adjustments.

### 6. Cash and balances with Central Bank of the U.A.E

	31.12.2020 AED'000	31.12.2019 AED'000
Cash on hand	54,304	53,882
Balances with CBUAE in:		
- Current accounts	842,980	486,542
- Interest free statutory deposits	56,986	76,672
	<u>954,270</u>	<u>617,096</u>

**Note:**

The statutory deposits are kept with CBUAE in UAE Dirhams (December 31, 2019: UAE Dirhams and US Dollars) and cannot be withdrawn without its approval. The level of these deposits changes every month in accordance with CBUAE directives.

**7. Related party transactions**

Related party comprise of the head office and its branches abroad, key management personnel and entities controlled, jointly controlled or significantly influenced by such parties.

The Bank in the normal course of business enters into transactions with other business enterprises that fall within the definition of related party contained in the International Accounting Standards No. 24. The Bank believes that the terms of such transactions are not significantly different from those that could have been obtained from third parties. The terms of these transactions with related party are approved by the Bank's management and are made on terms agreed by the Board of Directors or management.

The summary of balances with related parties as at the statement of financial position dates are as under:

## a) Due from head office and its branches abroad comprises:

	<u>31.12.2020</u> <u>AED'000</u>	<u>31.12.2019</u> <u>AED'000</u>
Head office	540,090	486,196
Branches abroad	30,287	13,369
	<u>570,377</u>	<u>499,565</u>

**Notes:**

i. Due from Head Office and its branches abroad includes AED 0.86 million (December 31, 2019: AED 5.17 million) of accrued interest debited to head office account.

ii. As at December 31, 2020, the exposure of head office and its branches abroad has exceeded the maximum exposure limit of 30% of the Bank's capital base. As per Circular No. 32/2013, Monitoring of Large Exposure Limits issued by the CBUAE., exposure to banks operating outside U.A.E. are not allowed to exceed 30% of the bank's capital base. The Bank has relied on the CBUAE letter CBUAE/BSO/2020/4769 dated October 27, 2020 where the large exposure breaches arising from decrease in regulatory capital after October 1, 2018 will not be subject to 1:1 deduction.

## b) Due to head office and its branches abroad comprises:

	<u>31.12.2020</u> <u>AED'000</u>	<u>31.12.2019</u> <u>AED'000</u>
Head office	464,914	41,916
Branches abroad	175,463	168,616
	<u>640,377</u>	<u>210,532</u>

**Note:**

During the year 2020, the head office of the Bank made a placement of an under lien deposit amounting to AED 103 million on a six monthly roll over basis.

## c) Others:

	<u>31.12.2020</u> <u>AED'000</u>	<u>31.12.2019</u> <u>AED'000</u>
Outstanding balance of loans with key management personnel	150	137
Customer deposits	110,728	125,272
Other liabilities	0	6,120
Contingent liability	879	879
Loans and advances to customers	454,960	477,139

**Note:**

Included in amounts due from other banks (note 8) is an amount of AED 4,773 thousands (December 31, 2019: AED 4,602 thousands) due from a subsidiary of the head office.

d) Related party transactions included in the statement of profit or loss and other comprehensive income are as follows:

	01.01.2020 to 31.12.2020 AED'000	01.01.2019 to 31.12.2019 AED'000
Interest income	11,076	16,133
Interest expense	4,458	4,145
Head office charges (Refer note 19)	5,861	6,120
Compensation of key management personnel	3,077	3,624

#### 8. Due from/to other banks

	31.12.2020 AED'000	31.12.2019 AED'000
a) Due from:		
-Banks abroad	1,072,920	1,342,802

##### Notes:

All above amounts are due from Iranian banks.

Due from other banks include foreign currency term loans issued to other Iranian banks and interest receivable from such term loans amounting to AED 1,067 million (December 31, 2019: AED 1,334 million) and AED 785 thousand (December 31, 2019: AED 1,526 thousand) respectively.

The bank has entered into a refinancing agreement (the "Agreement") with the Central Bank of Iran. As per the Agreement dated March 7, 2002 and various subsequent addendums, letters of credit opened by banks in the Islamic Republic of Iran would be refinanced by the Bank to the extent of USD 1,100 million (2019: USD 1,100 million).

The above balance includes funds received by the head office (Tehran, Iran) on behalf of the Bank from an Iranian bank in previous years for settlement of outstanding bills discounted. Subsequently, these funds were distributed among various other Iranian banks to continue compliance with large exposure regulations as prescribed in circular no. 32/2013 dated November 11, 2013.

	31.12.2020 AED'000	31.12.2019 AED'000
b) Due to:		
-Banks abroad	919,840	1,307,747

##### Notes:

All above amounts are due to the Iranian banks including AED 13.10 million (December 31, 2019: AED 149.27 million) due to the Central Bank of Islamic Republic of Iran.

Due to other banks include local currency term deposits from other Iranian banks and interest payable on such term deposits amounting to AED 111 million (December 31, 2019: AED 268 million) and AED 1,310 thousand (December 31, 2019: AED 2,621 thousand) respectively.

#### 9. Export bills discounted for Iranian banks abroad

This balance is due from Iranian banks abroad, representing amounts due on the export bills issued by them and discounted by the Bank for its customers.

## 10. Loans and advances

The composition of loans and advances portfolio is as follows:

	31.12.2020 AED'000	31.12.2019 AED'000
<b>a) By type</b>		
Overdrafts	9,320,221	9,176,962
Bills/cheques discounted	509,325	556,570
Term loans	1,509,492	1,603,383
Customer liabilities paid (payment against documents)	657,279	821,122
Loans against trust receipts	450,532	473,319
Gross amount of loans and advances	<u>12,446,849</u>	<u>12,631,356</u>
Less: Allowance for impairment against loans and advances	<u>(4,305,594)</u>	<u>(4,506,811)</u>
Interest in suspense	<u>(5,525,215)</u>	<u>(5,490,292)</u>
Net amount of loans and advances	<u><u>2,616,040</u></u>	<u><u>2,634,253</u></u>
<b>b) By economic sector</b>		
Wholesale and retail trade	9,906,474	10,018,262
Construction	417,983	423,478
Mining and quarrying	182,705	173,421
Services	1,091,525	1,230,301
Personal loans	82,223	92,709
Manufacturing	657,899	579,477
Transport and communication	8,251	11,300
Financial institutions	99,789	102,408
	<u>12,446,849</u>	<u>12,631,356</u>
<b>c) By geographical area</b>		
Within UAE	12,142,274	12,338,563
Islamic Republic of Iran	304,575	292,793
	<u>12,446,849</u>	<u>12,631,356</u>

### d) Movements in interest in suspense and allowance for impairment against loans and advances

Loans and advances in the statement of financial position are stated net of interest in suspense and allowance for impairment against loans and advances. The movements in interest in suspense and allowance for impairment against loans and advances during the year are as follows:

	2020		2019	
	Interest in suspense AED'000	Allowance for impairment against loans and advances AED'000	Interest in suspense AED'000	Allowance for impairment against loans and advances AED'000
Balance, at the beginning of the year	5,490,292	4,506,811	5,094,314	4,283,233
Allowance made during the year	0	81,650	0	343,984
Interest suspended during the year	224,827	0	451,469	0
Amount released/recovered during the year	(11,311)	(131,486)	(4,864)	(68,382)
Amounts written off during the year	(178,593)	(151,381)	(50,627)	(52,024)
Balance, at the end of the year	<u>5,525,215</u>	<u>4,305,594</u>	<u>5,490,292</u>	<u>4,506,811</u>

Gross amount of loans and advances to customers, individually determined to be impaired, before deducting any individually assessed impairment loss amounted to AED 12,242 million (December 31, 2019: AED 12,321 million).

The fair value of collaterals held by the Bank relating to loans individually determined to be impaired at December 31, 2020 amounts to AED 7,271 million (December 31, 2019: AED 6,651 million). The collateral consists of cash, investments and mortgaged real estate properties.

## 11. Other assets

	31.12.2020	31.12.2019
	AED'000	AED'000
Interest receivable	57,905	75,273
Prepaid expenses	1,068	3,421
Deferred tax assets	1,357,714	1,223,984
Value added tax receivable	1,562	993
Others	9,537	28,618
	<u>1,427,786</u>	<u>1,332,289</u>
Less: Allowance for impairment of other assets	<u>(8,479)</u>	<u>(8,479)</u>
	<u>1,419,307</u>	<u>1,323,810</u>

### Note:

The Bank received from the Bank's head office (Tehran, Iran), a letter (Ref no. 99/1371236) dated March 17, 2021, wherein it states that the head office of the Bank assessed sufficiency of future taxable profits of the Bank to utilise deductible temporary differences and concluded minimal uncertainty to the Bank's future taxable profits. Accordingly, the head office of the Bank has given reasonable assurance for the recovery of the deferred tax assets in foreseeable future in accordance with IAS 12 *Income Taxes*.

## 12. Property, plant and equipment

	Land	Building and leasehold improvements	Furniture, fixtures, fittings and office equipment	Motor vehicles	Right-of-use asset	Total
<b>Rate of depreciation</b>		5%-25%	25%-100%	33%	10%	
<b>Cost</b>						
As at December 31, 2018	9,871	76,227	34,757	2,170	0	123,025
Additions	0	0	1,175	0	0	1,175
Disposals	0	0	(103)	(174)	0	(277)
As at December 31, 2019	9,871	76,227	35,829	1,996	0	123,923

<b>Accumulated depreciation</b>						
As at December 31, 2018	0	61,065	33,466	2,169	0	96,700
Charge for the year	0	1,947	717	0	0	2,664
Eliminated on disposals	0	0	(103)	(174)	0	(277)
As at December 31, 2019	0	63,012	34,080	1,995	0	99,087
Charge for the year	0	1,931	771	0	2,943	5,645
Eliminated on disposals	0	(653)	(1,099)	0	0	(1,752)
<b>As at December 31, 2020</b>	<b>0</b>	<b>64,290</b>	<b>33,752</b>	<b>1,995</b>	<b>2,943</b>	<b>102,980</b>
<b>Carrying amount</b>						
<b>As at December 31, 2020</b>	<b>9,871</b>	<b>11,242</b>	<b>1,336</b>	<b>1</b>	<b>40,985</b>	<b>63,435</b>
As at December 31, 2019	9,871	13,215	1,749	1	0	24,836

## 13. Customer deposits

	31.12.2020 AED'000	31.12.2019 AED'000
Current accounts	247,158	230,413
Saving accounts	143,430	136,346
Deposit accounts	2,758,002	2,693,620
Margin accounts	22,579	42,627
	<b>3,171,169</b>	<b>3,103,006</b>

### Note:

Margin accounts and deposits held under lien as security for loans and advances and off balance sheet commitments (not recorded in the statement of financial position) as at December 31, 2020 amounted to AED 278 million (December 31, 2019: AED 356 million).

## 14. Other liabilities

	31.12.2020 AED'000	31.12.2019 AED'000
Interest payable	69,433	76,691
Lease liabilities	39,576	0
Provision for employees' end of service indemnity	19,377	19,195
Provision for taxation (Refer note 20)	4,910	3,710
Others	17,865	21,504
	<b>151,161</b>	<b>121,100</b>

**Note:**

i. Pension and national insurance contribution for UAE citizens are made by the Bank in accordance with Federal Law No. 7 of 1999. The Bank provides for employees' end of service indemnity to its expatriate employees in compliance with UAE Labour law.

ii. Movement in the employees' end of service indemnity is as follows:

	01.01.2020 to 31.12.2020 <u>AED'000</u>	01.01.2019 to 31.12.2019 <u>AED'000</u>
Balance, at the beginning of the year	19,195	19,058
Charge for the year	1,506	1,550
Payments during the year	(1,324)	(1,413)
Balance, at the end of the year	<u>19,377</u>	<u>19,195</u>

**15. Interest income**

	01.01.2020 to 31.12.2020 <u>AED'000</u>	01.01.2019 to 31.12.2019 <u>AED'000</u>
Interest income on:		
- Loans and advances to customers (including export bills refinanced and export bills discounted)	48,656	31,704
- Money market and interbank transactions	26,255	30,886
- Others	5	8
	<u>74,916</u>	<u>62,598</u>

**16. Interest expense**

	01.01.2020 to 31.12.2020 <u>AED'000</u>	01.01.2019 to 31.12.2019 <u>AED'000</u>
Interest expense on:		
- Customer deposits	128,873	132,990
- Deposits from financial institutions	11,620	15,534
	<u>140,493</u>	<u>148,524</u>

**17. Net fees and commission income**

	01.01.2020 to 31.12.2020 <u>AED'000</u>	01.01.2019 to 31.12.2019 <u>AED'000</u>
Fees and commission income	2,348	3,280
Fees and commission expense	(36)	(81)
	<u>2,312</u>	<u>3,199</u>

**18. Other income/expense - net**

	01.01.2020 to 31.12.2020 <u>AED'000</u>	01.01.2019 to 31.12.2019 <u>AED'000</u>
Foreign exchange loss	6,281	10,524
Bank charges	(48)	(33)
Other income	(9,948)	(3,175)
	<u>(3,715)</u>	<u>7,316</u>

**Note:**

Other income includes AED 1.6 million debited to the account which is loss booked on account of embezzlement of funds from customers' dormant accounts during prior years by an employee of the Bank.

**19. General and administrative expenses**

	01.01.2020 to 31.12.2020 AED'000	01.01.2019 to 31.12.2019 AED'000
Staff cost and related expenses	41,555	43,305
Head office charges (Refer note 7(d))	5,861	6,120
Depreciation on property, plant and equipment (Refer note 12)	5,645	2,664
Rent and related expenses	2,163	6,374
Others	10,374	13,110
	<u>65,598</u>	<u>71,573</u>

**20. Taxation**

The Bank is subject to taxation at the rate of 20% of the individual Emirates' taxable income for the year in the Emirates of Abu Dhabi, Dubai, Sharjah and Ajman. The taxable income is calculated after making certain adjustments to the net profit before tax for the year and is based on management's best estimates.

The movement in the provision for taxation during the year was as follows:

	01.01.2020 to 31.12.2020 AED'000	01.01.2019 to 31.12.2019 AED'000
Balance, at the beginning of the year	3,710	3,595
Tax charge:		
- Current year	4,910	3,710
- Prior year	44,311	15,066
	<u>52,931</u>	<u>22,371</u>
Tax paid during the year	(48,021)	(18,661)
Balance, at the end of the year (Refer note 14)	<u>4,910</u>	<u>3,710</u>

The relationship between the tax expense for the year and the accounting loss before tax for the year is as follows:

	01.01.2020 to 31.12.2020 AED'000	01.01.2019 to 31.12.2019 AED'000
Accounting loss	(75,312)	(437,218)
Adjustments for tax purposes	99,862	455,768
Taxable profit	<u>24,550</u>	<u>18,550</u>

	01.01.2020 to 31.12.2020 AED'000	01.01.2019 to 31.12.2019 AED'000
Current tax:		
Tax at the applicable rate of 20%	4,910	3,710
Tax charge in respect of prior years	44,311	15,066
	<u>49,221</u>	<u>18,776</u>
Deferred taxation	(133,730)	(361,217)
Taxation for the year	<u>(84,509)</u>	<u>(342,441)</u>

## 21. Statutory reserve

Article 239 of the UAE Federal Law No. (2) of 2015 requires that 10% of the net profit is transferred to a special reserve until such reserve equals 50% of the capital. This reserve is not available for distribution.

## 22. Cash and cash equivalents

Cash and cash equivalents comprise of the following balances with original maturities of three months or less:

	<u>31.12.2020</u> AED'000	<u>31.12.2019</u> AED'000
Cash and bank balances with CBUAE	954,270	617,096
Less: Statutory deposits with CBUAE	(56,986)	(76,672)
Cash and cash equivalents	<u>897,284</u>	<u>540,424</u>

## 23. Contingent liabilities and commitments

### *Credit related commitments*

The contractual amounts of the letters of credit and guarantees commit the Bank to make payments on behalf of customers contingent upon the customer satisfying the terms of the contract. The contractual amounts represent the credit risk, assuming that the amounts are fully advanced and that any collateral or other security is of no value. However, the total contractual amount of commitments does not necessarily represent future cash requirements since many of such commitments will expire or terminate without being funded.

The loan commitments represent the contractual commitments to make the loan. These generally have fixed expiry dates or other termination clauses and require a payment of a fee. Since commitments may expire without being drawn down, the total contract amounts do not necessarily represent future cash requirements.

The Bank has the following credit related commitments:

	<u>31.12.2020</u> AED'000	<u>31.12.2019</u> AED'000
<b><i>Contingent liabilities</i></b>		
Guarantees	<u>73,201</u>	<u>78,751</u>

The maturity profile of these contingent liabilities is as follows:

2020	<u>31.12.2020</u>	<u>31.12.2020</u>	<u>31.12.2020</u>	<u>31.12.2020</u>
	<i>Within</i> <i>3 months</i> AED'000	<i>3 months</i> <i>1 year</i> AED'000	<i>Over</i> <i>1 year</i> AED'000	<i>Total</i> AED'000
Guarantees	<u>36,493</u>	<u>31,057</u>	<u>5,651</u>	<u>73,201</u>
2019	<u>31.12.2019</u>	<u>31.12.2019</u>	<u>31.12.2019</u>	<u>31.12.2019</u>
	<i>Within</i> <i>3 months</i> AED'000	<i>3 months</i> <i>1 year</i> AED'000	<i>Over</i> <i>1 year</i> AED'000	<i>Total</i> AED'000
Guarantees	<u>4,795</u>	<u>5,993</u>	<u>67,963</u>	<u>78,751</u>

### **Note:**

The outstanding approved but unutilised facilities as of December 31, 2020 amounted to AED 20 million (December 31, 2019: AED 44 million). The unutilised portion of approved facilities can be revoked unilaterally at any time by the Bank.

## 24. Maturity analysis of assets and liabilities

Maturities of assets and liabilities recorded in the statement of financial position based on the remaining contractual maturity period at the reporting date, not taking account of the effective maturities as indicated by the deposit retention history of the Bank and the availability of liquid funds, as at the year-end are as follows:

	31.12.2020	31.12.2020	31.12.2020	31.12.2020	31.12.2020
	Less than 3 months	3 months to 1 year	1 year up to 5 years	Over 5 years	Total

## 25. Fair values of financial instruments

Fair value represents the amount at which an asset can be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. Differences can therefore arise between book value under the historical cost method and fair value estimates.

The fair values of financial assets and liabilities of the Bank are not materially different from their carrying values as at the year-end. This is based on management's assumption that the carrying amounts of financial assets and financial liabilities that are liquid or have a short term maturity (less than a year) approximate to their fair value.

## 26. Classification of financial assets and liabilities

	31.12.2020

## 27. Financial risk management

The Bank has set up a strong risk management infrastructure supported by adoption of best practices in the field of risk management to manage and monitor the following major risks arising out of their day to day operations:

- i. Credit risk
- ii. Liquidity risk
- iii. Market risk (including interest rate risk, foreign currency risk and price risk)
- iv. Operational risk

The Regional Manager has overall responsibility for the oversight of the risk management framework for the Bank. There are established detailed policies and procedures in this regard along with high powered senior management committees to ensure adherence to the approved policies and close monitoring of different risks within the operations of the Bank.

The Credit Committee, Assets and Liabilities Committee and Investment Committee work under the mandate of the Regional Manager to set up risk limits and manage the overall risk. These Committees approve risk management policies of the Bank developed by Risk Management Department.

The Risk Management function is independent of the business. It is responsible to develop credit, market and operational risk policies. Risk Managers are delegated authority within the risk management framework to approve credit risk transactions. Risk Management Department also monitors market and operational risk. The Credit Risk Unit within Risk Management Department is responsible to develop and validate financial risk models for risk rating.

Audit and Compliance is an independent department which is responsible to review the risk policies, risk exposures and the risk managing and monitoring frame work.

### ***Treasury***

The Treasury is responsible for managing the assets and liabilities of the Bank and its overall financial structure. It is also primarily responsible for the funding and liquidity risks of the Bank.

### ***Internal audit***

Risk management processes throughout the Bank are audited periodically by the Internal Audit function that examines both the adequacy of the procedures and the compliance by the Bank of these procedures. Internal Audit discusses the results of all assessments with management, and reports its findings and recommendations to the Regional Manager.

### ***Risk measurement and reporting systems***

Monitoring and controlling risks is primarily performed based on limits established by the Bank. These limits reflect the business strategy and market environment of the Bank as well as the level of risk that it is willing to accept, with additional emphasis on selected industries. In addition, the Bank monitors and measures the overall risk bearing capacity in relation to the aggregate risk exposure across all risk types and activities.

Information compiled from all the businesses is examined and processed in order to analyse, control and identify early risks. This information is presented and explained to the Regional Manager, the Risk Committee, and the Head of each business division. The report includes aggregate credit exposure, hold limit exceptions, liquidity ratios and risk profile changes. On a monthly basis detailed reporting of industry, customer and geographic risks takes place. Senior management assesses the appropriateness of the allowance for credit losses on a quarterly basis. The Regional Manager receives a comprehensive credit risk report once a quarter which is designed to provide all the necessary information to assess and conclude on the credit related risks of the Bank.

For all levels throughout the Bank, specifically tailored risk reports are prepared and distributed in order to ensure that all business divisions have access to extensive, necessary and up-to-date information.

A daily briefing is given to the Regional Manager and all other relevant members of management of the Bank on the utilisation of market limits, proprietary investments and liquidity, plus any other risk developments.

### ***Risk mitigation***

As part of its overall risk management, the Bank uses derivatives and other instruments to manage exposures resulting from changes in interest rates, foreign currencies, equity risks, credit risks, and exposures arising from forecast transactions.

The Bank actively uses collateral to reduce its credit risks.

### ***Excessive risk concentration***

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Bank's performance to developments affecting a particular industry or geographical location.

In order to avoid excessive concentrations of risk, the policies and procedures of the Bank include specific guidelines to focus on maintaining a diversified portfolio. Identified concentrations of credit risks are controlled and managed accordingly.

#### **i. Credit risk management**

The Regional Manager has delegated responsibility for the management of credit risk to its Credit Committee and the Credit Risk Management Department. Their responsibilities include:

- a. Formulating credit policies in consultation with business units, covering collateral requirements, credit assessment, risk grading and reporting, documentary and legal procedures, and compliance with regulatory and statutory requirements.
- b. Establishing the authorization structure for the approval and renewal of credit facilities. Authorization limits are allocated to business unit Credit Officers. Larger facilities require approval by Head Office Credit Facilities Committee, Head of Credit Facilities or Regional Credit Facilities Committee.
- c. Reviewing and assessing credit risk: Credit Facility Department and Risk Management Department assess all credit exposures in excess of designated limits, prior to facilities being committed to customers by the business unit concerned. Renewals and reviews of facilities are subject to the same review process.
- d. Limiting concentrations of exposure to counterparties, geographies and industries (for loans and advances to customers), and by issuer, credit rating band, market liquidity and country (for investment securities).
- e. Developing and maintaining the Bank's risk grading in order to categories exposures according to the degree of risk of financial loss faced and to focus management on the attendant risks. The risk grading system is used in determining where impairment provisions may be required against specific credit exposures. The responsibility for setting risk grades lies with the final approving executive/committee as appropriate. Risk grades are subject to regular reviews by Credit Facility Department, Branches and Risk Management Department.
- f. Reviewing compliance of business units with agreed exposure limits, including those for selected industries, country risk and product types. Regular reports are provided to the Regional Credit Facility Committee on the credit quality of local portfolios and appropriate corrective action is taken.
- g. Providing advice, guidance and specialist skills to business units to promote best practice throughout the Branches in the management of credit risk.

Policies relating to credit are reviewed and approved by the Regional Credit Facility Committee. All credit lines are approved centrally for the Bank in accordance with the credit policy set out in the Credit Policy Manual. In addition, whenever possible, loans are secured by acceptable forms of collateral in order to mitigate credit risk.

The Bank further limits risk through diversification of assets by geography and industry sectors.

All credit facilities are administered and monitored by the Credit Facility Department. Periodic reviews are conducted by the Credit Officer and also by Credit Facility Department.

Cross border exposure and financial institutions exposure limits for money market and treasury activities are approved as per guidelines established by the Regional Credit Facility Committee and are monitored by the Risk Management Department.

### ***Commercial/Institutional lending***

All credit applications for commercial and institutional lending are subject to the Bank's regional credit policies and to regulatory requirements, as applicable from time to time.

All credit lines or facilities extended by the Bank are made subject to prior approval pursuant to a delegated signature authority system under the ultimate authority of the Credit Facility Committee or the Regional Manager.

The management of the Bank has established country limits for cross border risk. Individual country limits are defined based on a detailed credit policy defining acceptable country credit risk exposure and evaluating and controlling cross border risk. These limits are regularly reviewed by the Bank's regional credit risk management and periodically by the Credit Facility Committee.

### Retail lending

Each retail credit application is considered for approval according to a product program, which is devised in accordance with guidelines set out in the product policy approved by the Regional Credit Facility Committee. All approval authorities are delegated to the Credit Facility Committee by the Regional Manager. Different authority levels are specified for approving product programs and exceptions thereto, and individual loans/credits under product programs. Each product program contains detailed credit criteria (such as salary multiples, bank statement, age, residency, etc.) and regulatory, compliance and documentation requirements, as well as other operating requirements.

### Maximum exposure to credit risk without taking account of any collateral and other credit enhancements

The table below shows the maximum exposure to credit risk for the components of the statement of financial position, including derivatives. The maximum exposure is shown gross, before the effect of mitigation through the use of master netting and collateral agreements and provisions held in the books.

	Notes	Gross maximum exposure 31.12.2020 AED '000	Gross maximum exposure 31.12.2019 AED '000
Balances with CBUAE	6	899,966	563,214
Due from head office and its branches abroad	7(a)	570,377	499,565
Due from other banks	8(a)	1,072,920	1,342,802
Export bills discounted for Iranian banks abroad	9	3,865	108,493
Loans and advances	10	12,446,849	12,631,356
Other assets	11	67,442	103,891
		<b>15,061,419</b>	<b>15,249,321</b>
Contingent liabilities	23	73,201	78,751
		<b>15,134,620</b>	<b>15,328,072</b>

### Risk concentrations of the maximum exposure to credit risk

Concentration of risk is managed by client counterparty, by geographical region and by industry sector. The financial assets of the Bank, before taking into account any collateral held or other credit enhancements can be analysed by the following geographical regions:

	Gross maximum exposure 31.12.2020 AED '000	Gross maximum exposure 31.12.2019 AED '000
<b>Geographic regions</b>		
Middle East	13,122,540	13,006,482
Iran	1,931,901	2,224,990
Organisation for Economic Co-operation and Development countries	6,978	17,849
	<b>15,061,419</b>	<b>15,249,321</b>
<b>Industry sector</b>		
Wholesale and retail trade	9,906,474	10,018,262
Construction	417,983	423,478
Mining and quarrying	182,705	173,421
Services	1,091,525	1,230,301
Personal loans	82,223	92,709
Manufacturing	657,899	579,477
Transport and communication	8,251	11,300
Financial institutions	2,714,359	2,720,373
	<b>15,061,419</b>	<b>15,249,321</b>

### Model risk management

The Bank uses a number of quantitative models in many of its financial and business activities from underwriting a credit facility to reporting expected credit losses under the IFRS 9.

To manage the model risks, the Bank has developed and implemented Business Model Framework which contains Bank wide development, implementation and validation policies and practices. According to the framework, all internally or externally developed risk quantification models that directly affect the financial reporting on expected credit losses require validation periodically (internally or externally). BSI IFRS 9 Committee is responsible for overseeing all model related development, implementation of framework and performance of the models.

The Framework establishes a systematic approach to manage the development, implementation, approval, validation and ongoing use of models. It sets out an effective governance and management structure with clearly defined roles and responsibilities, policies and controls for managing model risk. The Framework is reviewed on a regular basis to ensure it meets regulatory standards and international practices. Any major change to the Framework is approved by the Regional Credit Committee and Risk Policy Committee upon recommendation of BSI IFRS 9 Committee.

### Maximum exposure to credit risk – Financial instruments subject to impairment

The following table contains an analysis of the credit risk exposure of financial instruments for which an ECL allowance is recognised. The gross carrying amount of financial assets (excluding cash in hand) below also represent the Bank's maximum exposure to credit risk on these assets.

As at December 31, 2020	Stage 1 12-month ECL <u>AED '000</u>	Stage 2 Lifetime ECL <u>AED '000</u>	Stage 3 Lifetime ECL <u>AED '000</u>	Total <u>AED '000</u>

Stage 3	5,391	12,241,573	5,391	12,321,401
Stage 2	34,516	5,712	137,742	2,501
Stage 1	2,574,663	199,564	2,474,832	307,454
Carrying amount	<b>2,614,570</b>	<b>12,446,849</b>	<b>2,617,965</b>	<b>12,631,356</b>

It is the policy of the Bank to maintain accurate and latest risk ratings across the credit portfolio. This facilitates focused management of the applicable risks and the comparison of credit exposures across all lines of business, geographic regions and products. The rating system is supported by a variety of financial analytics, combined with processed market information to provide the main inputs for the measurement of counterparty risk.

Ageing analysis of stage 2 investing and financing assets per class of financial assets is as under:

<b>At December 31, 2020</b>	1 month <i>AED '000</i>	1 month to 3 months <i>AED '000</i>	More than 3 months <i>AED '000</i>	Total <i>AED '000</i>

	<b>0</b>	<b>2,501</b>	<b>137,742</b>	<b>140,243</b>

### **Collateral and other credit enhancements**

The amount and type of collateral required depends on an assessment of the credit risk of the counterparty. The credit manual contains guidelines regarding the acceptability of types of collateral and valuation parameters. The main types of collateral obtained are cash, securities, charges over real estate properties, inventory, trade receivables and guarantees - both corporate and personal.

The Regional Credit Committee monitors the market value of collateral, if needed in accordance with the underlying agreement. The estimates of fair values are generally not updated except when a loan is individually assessed or impaired. Collaterals are usually not held against amounts advanced to banks.

It is the policy of the Bank to dispose off repossessed properties in an orderly fashion. The proceeds are used to reduce or repay the outstanding claim. In general, the Bank does not occupy repossessed properties for business use.

### **Credit review procedures and loan classification**

The Internal Audit Department of the Bank undertakes an independent quality evaluation on a regular basis in conformity with the guidelines of the CBUAE and internal policies in order to assist in the early identification of accrual and potential performance problems.

If a credit is overdue for 90 days or more, interest is suspended and is not credited to income. Specific allowance for impairment of classified assets is made based on probable recoverability of outstanding and risk ratings of the assets.

### **Internal risk rating**

The Bank uses specific internal credit risk rating models tailored to various industry segments / counterparty. Borrower and loan specific information collected at the time of application (such as financial condition, level of collaterals, condition of the market and business segment of customer, reputation of the customer and its owners, management and conduct of accounts) is fed into this rating model. This is supplemented with external data input into the model.

These risk ratings have been mapped into ECL Stages which are defined below:

<b>Stage</b>	<b>Grade</b>
Stage 1	Aa+, Ab+, Ac+, Ba+, Bb+, Bc+, Ca+, Cb+, Cc+
Stage 2	Aa, Ab, Ac, Ba, Bb, Bc, Ca, Cb, Cc
Stage 3	Aa-, Ab-, Ac-, Ba-, Bb-, Bc-, Ca-, Cb-, Cc-

The grades above are defined as a combination of component of grades derived from various ranges allocated to following groups:

<b>Group</b>	<b>Component of grade</b>	<b>Range</b>
Capacity risk	A	65-100
	B	30-64
	C	0-29
Performance risk	a	65-100
	b	30-64
	c	0-29
Credit risk	-	0-29
	+	65-250
	<->	30-64

### **Expected credit loss measurement**

The estimation of credit exposure for risk management purposes is complex and requires the use of models, as the exposure varies with changes in market conditions, expected cash flows and the passage of time. The assessment of credit risk of a portfolio of assets entails further estimations as to the likelihood of defaults occurring, of the associated loss ratios and of default correlations between counterparties. The Bank measures credit risk using Probability of Default (PD), Exposure at Default (EAD) and Loss Given Default (LGD). This is similar to the approach used for the purposes of measuring Expected Credit Loss (ECL) under IFRS 9. Refer to note 4e for more details.

### Expected credit losses

The following table summarises impairment allowance as at December 31, 2020 and December 31, 2019 per class of assets and stage:

	31.12.2020			
	ECL staging			
	Stage 1	Stage 2	Stage 3	Total
	12-month ECL	Lifetime ECL	Lifetime ECL	
	AED '000	AED '000	AED '000	AED '000
Balances with CBUAE	0	0	0	0
Due from head office and its branches abroad	0	0	0	0
Due from other banks	0	0	0	0
Export bills discounted for Iranian banks abroad	0	0	0	0
Loans and advances	167,051	52	4,138,491	4,305,594
Other assets	0	0	8,479	8,479
<b>Total allowance for impairment</b>	<b>167,051</b>	<b>52</b>	<b>4,146,970</b>	<b>4,314,073</b>
	31.12.2019			
	ECL staging			
	Stage 1	Stage 2	Stage 3	Total
	12-month ECL	Lifetime ECL	Lifetime ECL	
	AED '000	AED '000	AED '000	AED '000
Balances with CBUAE	0	0	0	0
Due from head office and its branches abroad	0	0	0	0
Due from other banks	0	0	0	0
Export bills discounted for Iranian banks abroad	0	0	0	0
Loans and advances	166,981	122	4,339,708	4,506,811
Other assets	0	0	8,479	8,479
<b>Total allowance for impairment</b>	<b>166,981</b>	<b>122</b>	<b>4,348,187</b>	<b>4,515,290</b>

The movement of impairment allowance is as follows:

	Stage 1	Stage 2	Stage 3	Total
	12-month ECL	Lifetime ECL	Lifetime ECL	
	AED '000	AED '000	AED '000	AED '000
	<b>Financial instruments carried at amortised costs</b>			
Balance as at December 31, 2018	167,031	72	4,124,609	4,292
- Transfer from Stage 1 to Stage 2	(50)	50	0	0
Other movements within the same stage	0	0	275,602	275,602
Gross charge for the year	(50)	50	275,602	275,602
Net amounts written-off	0	0	(52,024)	(52,024)
Balance as at December 31, 2019	166,981	122	4,348,187	4,515,290
- Transfer from Stage 2 to Stage 1	70	(70)	0	0
Other movements within the same stage	0	0	(49,836)	(49,836)
Gross charge for the year	70	(70)	(49,836)	(49,836)
Net amounts written-off	0	0	(151,381)	(151,381)
<b>Balance as at December 31, 2020</b>	<b>167,051</b>	<b>52</b>	<b>4,146,970</b>	<b>4,314,073</b>

### ***Significant increase in credit risk***

The Bank considers a financial asset to have experienced a significant increase in credit risk when a significant change in one year probability of default occurs between the origination date of a specific facility and the IFRS 9 ECL run date.

#### Quantitative criteria

If the borrower experiences a significant increase in probability of default which can be triggered by the following quantitative factors:

- Past Due
- Net Worth Erosion
- Fraudulent Activity
- Distressed Restructure
- Financial Covenants Breach
- Significant Operations Disruption
- Operating Performance
- Operating Efficiency
- Debt Service
- Liquidity Assessment
- Capital structure

#### Qualitative criteria:

If the borrower experiences a significant increase in probability of default which can be triggered by the following qualitative factors:

- Management
- Industry Outlook
- Financial Conduct
- Income Stability
- Lifecycle Stage
- Auditor Information

The Bank has not used the low credit exemption for any financial instruments in the year ended December 31, 2020.

#### Backstop:

If the borrower is more than 60 days past due on its contractual payments, a backstop is applied and the financial asset is considered to have experienced a significant increase in credit risk.

### ***Forward-looking information incorporated in the ECL models***

The assessment of SICR and the calculation of ECL both incorporate forward-looking information. In particular, when assessing expected credit losses, the analysis of macroeconomic and financial factors, expected risks and dynamics are taken into account i.e. the PD is predicted by using past event, current conditions and future outcomes. The Bank has performed historical analysis and identified the key economic variables such as GDP growth, unemployment, inflation, oil prices etc., impacting credit risk and expected credit losses for each portfolio. The inputs and models used for calculating expected credit losses may not always capture all characteristics of the market at the date of the financial statements. To reflect this, qualitative adjustments or overlays are made as systematic adjustment using expert credit judgment on the basis of information available from credible sources.

As with any economic forecasts, the projections and likelihoods of occurrence are subject to a high degree of inherent uncertainty and therefore the actual outcomes may be significantly different to those projected. The Bank considers these forecasts to represent its best estimate of the possible outcomes and has analysed the non-linearities and asymmetries within the Bank's different portfolios to establish that the chosen scenarios are appropriately representative of the range of possible scenarios.

### ***Off balance sheet***

The Bank applies the same risk management policies for off balance sheet risks as it does for its on balance sheet risks. In the case of commitments to lend, customers and counterparties will be subject to the same credit management policies as for loans and advances. Collateral may be sought depending on the strength of the counterparty and the nature of the transaction.

### Impairment reserve under the CBUAE guidance

The CBUAE issued its IFRS 9 guidance on April 30, 2018 via notice no. CBUAE/BS/2018/458 addressing various implementation challenges and practical implications for Banks adopting IFRS 9 in the UAE ("the guidance").

The reconciliation between general and specific provision under Circular 28/2010 of CBUAE and IFRS 9 is as follows:

	<u>31.12.2020</u> <i>AED '000</i>	<u>31.12.2019</u> <i>AED '000</i>
<b>Impairment reserve: General</b>		
General provisions under Circular 28/2010 of CBUAE	50,539	56,090
Less: Stage 1 and Stage 2 provisions under IFRS 9	167,103	167,103
General provision transferred to the impairment reserve	<u>0</u>	<u>0</u>
<b>Impairment reserve: Specific</b>		
Specific provisions under Circular 28/2010 of CBUAE	4,146,970	4,348,187
Less: Stage 3 provisions under IFRS 9	4,146,970	4,348,187
Specific provision transferred to the impairment reserve*	<u>0</u>	<u>0</u>
Total provision transferred to the impairment reserve	<u>0</u>	<u>0</u>

\*In the case where provisions under IFRS 9 exceed provisions under CBUAE, no amount shall be transferred to the impairment reserve.

### ii. Liquidity risk

Liquidity risk is the risk that the Bank will encounter difficulty in meeting obligations from its financial liabilities at a given point in time.

#### Management of liquidity risk

The approach of the Bank towards managing the liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the reputation of the Bank.

Treasury receives information from other business units regarding the liquidity profile of their financial assets and liabilities and details of other projected cash flows arising from projected future business. Treasury then maintains a portfolio of short-term liquid assets, largely made up of loans and advances to banks and other inter-bank facilities, to ensure that sufficient liquidity is maintained within the Bank as a whole. The liquidity requirements of business units and branches are met through short-term loans from Treasury to cover any short-term fluctuations and longer term funding to address any structural liquidity requirements.

#### Assets Liability Committee (ALCO)

ALCO has a broad range of authority delegated by the Regional Manager to manage the asset and liability structure and funding strategy of the Bank. ALCO meets on a quarterly basis or more often as circumstances dictate to review liquidity ratios, asset and liability structure, interest rates and foreign exchange exposures, internal and statutory ratio requirements, funding gaps and general domestic and international economic and financial market conditions. ALCO formulates liquidity risk management guidelines for the operation of the Bank on the basis of such review.

#### Exposure to liquidity risk

The key measure used by the Head of Risk, Head of Accounts and the Head of Dealing Department for managing liquidity risk is the ratio of net liquid assets to deposits from customers. For this purpose net liquid assets are considered as including cash and cash equivalents less any deposits from banks, other borrowings and commitments maturing within the next month. A similar, but not identical, calculation is used to measure the compliance by the Bank with the liquidity limit established by the regional management. The other indicators closely monitored on regular basis are Advances to Deposit Ratio, Uses to stable resources ratio. For all the measures, benchmarks are set and same are reviewed by ALCO on a regular basis.

### Mitigating liquidity risk

The Treasury and Marketing of the Bank is responsible for mitigating liquidity risk by implementing liquidity strategies such as diversification of types of investors/depositors including wholesale customers and trading companies. Further, the Bank enters into exposure with other Iranian Banks under refinancing facilities which are backed by the Central Bank of Iran. The Bank closely monitors the global view in respect of sanctions levied by the UN and has developed strategies and business continuity plans that should ensure that the business and liquidity of the Bank are not at risk. The Treasury regularly monitors the liquidity status of the Bank.

### Analysis of financial liabilities by remaining contractual maturities

The table below summarises the maturity profile of the financial liabilities of the Bank at the year-end based on contractual undiscounted repayment obligations. Repayments which are subject to notice are treated as if notice were to be given immediately. However, the Bank expects that many customers will not request repayment on the earliest date the Bank could be required to pay and the table does not reflect the expected cash flows indicated by the deposit retention history.

Financial liabilities	On demand AED '000	Less than 3 months AED '000	3 to 12 months AED '000	1 to 5 years AED '000	Over 5 years AED '000	Total AED '000
<b>December 31, 2020</b>						
Due to other banks	807,230	0	112,610	0	0	919,840
Customer deposits	582,553	674,632	1,777,313	203,867	0	3,238,365
Due to head office and its branches abroad	383,876	186,331	70,170	0	0	640,377
Other liabilities	87,298	714	3,572	15,685	19,605	126,874
<b>Total undiscounted financial liabilities</b>	<b>1,860,957</b>	<b>861,677</b>	<b>1,963,665</b>	<b>219,552</b>	<b>19,605</b>	<b>4,925,456</b>
Financial liabilities	On demand AED '000	Less than 3 months AED '000	3 to 12 months AED '000	1 to 5 years AED '000	Over 5 years AED '000	Total AED '000
<b>December 31, 2019</b>						
Due to other banks	1,036,845	163,825	107,077	0	0	1,307,747
Customer deposits	545,517	684,762	1,550,981	395,162	0	3,176,422
Due to head office and its branches abroad	57,407	82,946	70,179	0	0	210,532
Other liabilities	98,195	0	0	0	0	98,195
<b>Total undiscounted financial liabilities</b>	<b>1,737,964</b>	<b>931,533</b>	<b>1,728,237</b>	<b>395,162</b>	<b>0</b>	<b>4,792,896</b>

### iii. Market risk management

Market risk is the risk that the fair value or future cash flows of the financial instruments will fluctuate due to changes in market variables such as interest rates, foreign exchange rates, and equity prices.

Market risk is managed within the risk limits approved by the Regional Committee. The overall risk limits are divided into sub-limits by reference to different risk factors, including interest rate, foreign exchange rate, commodity price and equity price. Considering the different nature of the products involved, limits are set by using a combination of risk measurement techniques, including position limits and sensitivity limits.

The Bank uses different methodologies to estimate the potential losses that could occur on risk positions taken due to movements in interest rates, foreign exchange rates, commodity prices and equity prices over a specified time horizon and to a given level of confidence.

#### Interest rate risk management

Interest rate risk arises from the possibility that changes in interest rates will affect the value of financial instruments. The Bank is exposed to interest rate risk as a result of mismatches or gaps in the amounts and the currency of assets and liabilities.

Most of the interest bearing assets and liabilities of the Bank carry a fixed rate of interest and therefore management believes that there is no significant interest rate risk for the Bank.

The effective interest rate on loans and advances 5.82% per annum (2019: 5.71% per annum), on customer deposits 4.13% per annum (2019: 4.03% per annum) and on bank borrowings 0.78% per annum (2019: 1.03% per annum).

If interest rates had been 50 basis points lower throughout the year and all other variables were held constant, the Bank's loss for the year ended December 31, 2020 would have decreased by approximately AED 21.56 million (2019: AED 22.61 million).

#### Foreign currency risk

Foreign currency risk represents the risk of change in the value of financial instruments due to changes in foreign exchange rates. The Regional Manager has set limits on positions by currencies, which are monitored daily, and hedging strategies are also used to ensure that positions are maintained within the limits.

The assets of the Bank are typically funded in the same currency as that of the business transacted in order to minimize foreign exchange exposure. However, the Bank does maintain a long US Dollar position within limits approved by the Assets and Liabilities Committee (ALCO). The Bank manages exposure to the effects of fluctuations in prevailing foreign currency exchange rates on its financial position and cash flows. The Regional Manager sets limits on the level of exposure by currency and in total for both overnight and intra-day positions, which are monitored daily. At the end of the year, the Bank had the following significant net exposure denominated in foreign currencies:

	Net overall long/(short) position	
	31.12.2020 AED '000	31.12.2019 AED '000
US Dollars	1,110,839	1,314,025
Euro	(436)	(2,150)
Japanese Yen	(50)	(48)
Pound Sterling	4,066	3,928
Other currencies	(27,738)	(28,229)
	<u>1,086,681</u>	<u>1,287,526</u>

The analysis below calculates the effect of a 10 percent possible downward movement in a particular foreign currency rate against UAE Dirham, with all other variables held constant on the profit and loss (due to the fair value of currency sensitive monetary assets and liabilities). A negative amount in the table reflects a potential net reduction in statement of profit or loss and other comprehensive income, while positive amount reflects a potential net increase.

	31.12.2020 AED '000	31.12.2019 AED '000
Euro	44	215
Japanese Yen	5	5
Pound Sterling	(407)	(393)
Other currencies	2,774	2,823
	<u>2,416</u>	<u>2,650</u>

As the UAE Dirham is currently pegged to the US Dollar, balances in US Dollar are not considered to represent any currency risk. Accordingly, the above table does not include the impact of changes in the foreign exchange rate of the US Dollar.

#### Price risk

Price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factor specific to the individual financial instrument or its issuer or by factors affecting all similar financial instruments traded in the market.

#### iv. Operational risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people, systems, or from external events. The Bank aims to manage this risk in line with best practices and in preparation for the implementation of Basel III.

The Bank manages operational risk by identifying, assessing, monitoring, controlling and mitigating the risks, and review the risks inherent in business processes, activities and products through internal consultation. The business processes of the Bank are developed to prevent money laundering or financing terrorist activities. The anti-money laundering policies of the Bank are regularly reviewed to ensure full compliance with local regulatory requirements and international best practices. As part of operational risk management strategy, the Bank has complied with the notices and circulars issued by CBUAE in relation to the UN sanctions and stopped dealing with all parties detailed in the sanctions list. The Bank regularly monitors operational risk losses and reports the same to the senior management. As part of the internal control environment, the Bank maintains adequate documentation of control procedures for its business processes. The Bank also emphasises the need for appropriate segregation of duties and independent authorisation in all business activities.

The Business Continuity Plan is in place to support business operations in the event of disasters. Adequate backup facilities are maintained and periodic drills are conducted. In addition, the Bank also arrange insurance cover to reduce potential losses in respect of operational risk.

## 28. Capital management

### *Regulatory capital*

The CBUAE sets and monitors capital requirements for banks and branches of foreign banks operating in the United Arab Emirates.

### **Basel III capital ratio**

The Bank calculates its Capital Adequacy Ratio in line with the Basel III guidelines issued by CBUAE. These guidelines came into effect from February 01, 2017 with first reporting requirement starting from December 2017 onwards. Under these regulations, minimum capital requirements are monitored at three levels, namely Common Equity Tier 1 ('CET1'), Tier 1('T1') and Total Capital.

The regulatory capital of the Bank is analysed into different tiers:

- i. Common Equity Tier 1 Capital, which includes Common shares issued by a bank, Share premium resulting from the issue of instruments included in CET1, retained earnings, legal reserves, statutory reserves, accumulated other comprehensive income and other disclosed reserves, minority interest, which are eligible for inclusion in CET1 and regulatory adjustments including deferred tax asset applied in the calculation of CET1;
- ii. Additional Tier 1 Capital (AT1);
- iii. Tier 1 capital, which is the total of Common equity Tier 1 (CET1) Capital and Additional Tier 1 (AT1) capital;
- iv. Tier 2 capital, which includes general provisions (Collective allowance for impairment subject to a limit of 1.25% of credit RWA), perpetual equity instruments, not included in Tier 1 capital and instruments which are eligible for inclusion of Tier 2 e.g. subordinated loan.

The additional capital buffers (Capital Conservation Buffer (CCB) and Countercyclical Capital Buffer (CCyB) - maximum up to 2.5% for each buffer) introduced under Basel III guidelines are over and above the minimum CET1 requirement of 7%.

For 2020, CCB will be required to be maintained at 2.5% (2019:2.5%) of the Capital base. CCyB is not yet in effect and is not required to be maintained for 2020.

For the purpose of the value calculation of the regulatory adjustments including deferred tax asset, the Bank is required to apply 100% of the total value for the year 2020 (2019: 100%).

The Bank's RWA are weighted as to their relative credit, market and operational risk. Credit risk includes both on and off-balance sheet risks. Market risk is defined as the risk of losses in on and off-balance sheet positions arising from movements in market prices and includes interest rate risk, foreign exchange risk, equity exposure risk, commodity risk and options risk. Operational risk is defined as the risk of loss resulting from inadequate or failed internal processes, people or systems, or from external events. The bank is following the standardised measurement approach for credit, market and operational risk, as per Basel Requirements.

The Bank has complied with all externally imposed capital requirements throughout the year.

In November 2020, CBUAE issued an update to the Capital Adequacy Standards (notice number 1733/2020 published earlier in April 2020 vide notice number CBUAE/BSN/2020/4980. Under the revised notice, banks are expected to implement requirements of the capital standards in a phased manner which will allow the banks to absorb the new regulations without over burdening them during the Covid-19 pandemic.

- Banks can tap into their Capital Conservation Buffer (CCB) up to a maximum of 60% and D-SIB buffer up to 100% without supervisory consequences.

- CBUAE allows banks to apply prudential filter to IFRS 9 expected loss provisions. The prudential filter aims to minimize the effect of IFRS 9 provisions on regulatory capital, in view of expected volatility due to the Covid-19 crisis.

The CBUAE announced a comprehensive TESS on March 15, 2020, allowing UAE Banks to access zero cost funding and pass on the benefit through Principal or/and Interest deferrals to their customers. However, as at the reporting date, the Bank has not utilised grant of an extension of such zero cost of funding facility under TESS program.

The regulatory capital position of the Bank at the year-end under Basel III is as follows:

	<u>31.12.2020</u>	<u>31.12.2019</u>
	<u>AED '000</u>	<u>AED '000</u>
<b>Capital Base</b>		
Assigned capital	2,350,000	2,350,000
Statutory reserve	522,473	521,553
Accumulated losses	(1,054,806)	(1,063,083)
<b>CET1 capital (prior to regulatory deductions)</b>	<b>1,817,667</b>	<b>1,808,470</b>
Regulatory deductions	(1,357,714)	(1,223,984)
<b>Total CET1 capital after transitional adjustments</b>	<b>459,953</b>	<b>584,486</b>
Additional Tier 1 (AT1) Capital	0	0
Transitional adjustments	0	0
<b>Total AT1 capital after transitional adjustments</b>	<b>0</b>	<b>0</b>
<b>Total tier 1 capital</b>	<b>459,953</b>	<b>584,486</b>
Collective impairment allowance on loans and advances	50,645	56,090
Transitional adjustments	0	0
<b>Tier 2 (T2) Capital after transitional adjustments</b>	<b>50,645</b>	<b>56,090</b>
<b>Total capital base</b>	<b>510,598</b>	<b>640,576</b>
<b>Risk-weighted assets</b>		
Credit risk	4,051,634	4,487,191
Market risk	9,029	7,580
Operational risk	0	263,145
<b>Total risk weighted assets (RWA)</b>	<b>4,060,663</b>	<b>4,757,916</b>

<b>Capital Ratio</b>	<b>Minimum requirement</b>	<b>Capital ratios</b>	<b>Minimum requirement</b>	<b>Capital ratios</b>
	<b>2020</b>		<b>2019</b>	
a. Total	<b>10.50%</b>	<b>12.57%</b>	10.50%	13.46%
b. Additional Tier 1 ratio	<b>8.50%</b>	<b>11.33%</b>	8.50%	12.28%
c. CET 1 ratio	<b>7.00%</b>	<b>11.33%</b>	7.00%	12.28%
d. CET 1 for the buffer requirement	<b>2.50%</b>	<b>4.33%</b>	2.50%	5.28%

#### Capital allocation

The allocation of capital between specific operations and activities is, to a large extent, driven by optimisation of the return achieved on the capital allocated. The amount of capital allocated to each operation or activity is based primarily upon the regulatory capital. The process of allocating capital to specific operations and activities is undertaken independently of those responsible for the operation, by Risk and Credit Facility Department, and is subject to review by ALCO as appropriate.

Although maximisation of the return on risk-adjusted capital is the principal basis used in determining how capital is allocated within the Bank to particular operations or activities, it is not the sole basis used for decision making. Account is also taken of synergies with other operations and activities, the availability of management and other resources, and the fit of the activity with the longer term strategic objectives of the Bank. The policies of the Bank in respect of capital management and allocation are reviewed regularly.

## 29. Assets and liabilities re-pricing profile

Assets and liabilities re-pricing profile has been determined on the basis of the final maturity period or interest re-pricing periods, at the reporting date, whichever is earlier.

December 31, 2020	Less than 3 months AED '000	3 months to 1 year AED '000	Over 1 year AED '000	Non- interest AED '000	Total AED '000
<b>Assets</b>					
Cash and balances with Central Bank of the U.A.E	0	0	0	954,270	954,270

### 30. United Nations, Office of Foreign Assets Control and other restrictions

In its Resolution No. 1803 of 3 March 2008 the United Nations Security Council called upon its member states to exercise vigilance over the activities of financial institutions in their territories with all banks domiciled in Iran, including Bank Saderat Iran and its branches abroad.

The Security Council of the United Nations had also previously resolved to impose restrictions on certain Iranian entities and individuals, which have been subject to implementing notices by CBUAE. The Bank has fully complied with CBUAE notices issued in this regard. Management of the Bank also believes that despite such restrictions being imposed, the going concern assumption used in the preparation of financial statements for the year ended December 31, 2020 is still appropriate.

The Office of Foreign Assets Control ("OFAC") of the United States Department of the Treasury has also resolved to impose restrictions on certain Iranian entities and individuals, including the Bank. Management believes that to date these restrictions have had no material impact on the Bank's ability to continue as a going concern.

In the last few years, a number of countries including US, UK and other European countries have imposed / reinforced sanctions on Iranian banks. More significantly, European Union Council Decision 2012/152/CFSP of March 15, 2012 provided for a ban on the supply of specialised financial messaging services used to exchange financial data, to certain Iranian banks. As a result of this, the Society for Worldwide Interbank Financial Telecommunication ("SWIFT") has disconnected certain Iranian banks from its international network with effect from March 17, 2012.

Management of the Bank believes that since the Bank has not had business dealings / relations with any of the European / US banks for a long period of time and as it mainly deals with Iranian Banks which have their own intra-communication arrangements, the business activities of the Bank have not been significantly affected by the inability to use SWIFT. Further, in response to this, the Bank has introduced measures in order to ensure uninterrupted, legalised, authenticated transmission of messages and continuation of business activities including transfer of funds.

These financial statements do not take account of the potential future impacts of the current and any further restrictions that may be imposed by The Security Council of the United Nations and The Office of Foreign Assets Control of the United States' Department of the Treasury and restrictions that may be imposed by other countries.

### 31. Risk management in the current economic scenario

The economic fallout of COVID-19 crisis is expected to be significant and continues to evolve rapidly. Regulators and governments across the globe have introduced fiscal and economic stimulus measures to mitigate its impact. The CBUAE also announced multiple measures and incentives totalling to AED 256 billion to help banks support the economic sectors and individuals in the UAE impacted by this crisis.

#### Impact of Covid-19 on the Bank

In response to COVID-19 crisis, the Bank continues to monitor and respond to all liquidity and funding requirements through its plans of liquidity contingency and stress tests reflecting the current economic scenarios. The Bank shall continue to re-assess the strength of its liquidity, funding and capital position to absorb the possible impact of the current disruption as at the end of December 31, 2020.

The Bank is currently reviewing the potential impact of COVID-19 outbreak on the inputs and assumptions for IFRS 9 ECL measurement in light of available information. Overall, the COVID-19 situation remains fluid and is rapidly evolving at this point, which makes it challenging to reliably reflect impacts in ECL estimates. Therefore, the Bank shall continue to follow the business processes that are already in place, relating to credit risk management and estimation process of determining impairment allowances for loans and advances to customers. Any reassessment of the framework and methodology, designed and implemented by the Bank, regarding the outcomes and stage allocations of the impairment model shall be performed as at the end of the current financial year.

#### Liquidity management

Global stress in the markets brought on by the COVID-19 crisis was felt by the UAE banks in March and early April 2020 largely due to lack of liquidity in foreign funding markets. The decline in oil prices has also led to uncertainty about the oil rich GCC region's Governments' finances.

The CBUAE has adopted a proactive approach in order to ensure flow of credit to the economy, especially sectors severely impacted by the COVID-19 crisis. The CBUAE announced a comprehensive TESS on March 15, 2020, allowing UAE Banks to access zero cost funding and pass on the benefit through Principal or/and Interest deferrals to their customers. As at the reporting date, the Bank has not participated in the TESS program due to the sanctions and restrictions in place to communicate and transact via Thomson Reuters or SWIFT.

### 32. Update on prospective changes in reference rates (Ibor)

A fundamental reform of major interest rate benchmarks is being undertaken globally to replace or reform Interbank Offer Rates (IBORs) with alternative nearly risk-free rates (referred to as 'IBOR reform'). The Bank does not have significant exposure to IBORs through its financial instruments. There is significant uncertainty over the timing and the methods of transition across the jurisdictions within which the Bank operates. The Bank anticipates that IBOR reform will not have significant risk management and accounting impacts across all of its business lines.

### 33. Significant events occurring after the statement of financial position date

There are no significant events occurring after the statement of financial position date which require disclosure in the financial statements.

### 34. Previous year's figures

Previous year's figures have been re-grouped or re-arranged wherever necessary so as to conform to the current year's presentation.

35. In the opinion of the Management all the assets as shown in the financial statements are existing and realisable at the amount shown against them and there are no liabilities against the Bank, contingent or otherwise, not included in the above financial statements.
